OPNAV INSTRUCTION 3100.6H

From: Chief of Naval Operations

Subj: SPECIAL INCIDENT REPORTING (OPREP-3 PINNACLE, OPREP-3 NAVY BLUE, AND OPREP-3 NAVY UNIT SITREP) PROCEDURES

1. Purpose. To provide updated reporting procedures per references (a) and (b).

2. Cancellation. OPNAVINST 3100.6G and NAVADMIN 064/00, Change to Reporting Missing, Lost, Stolen, or Recovered (MLSR) Government Property. This instruction has been administratively revised and should be reviewed in its entirety.

3. References. See Appendix F.

4. Applicability. Applies to all Navy commands, afloat and ashore, to include Recruiting and Training Commands. This instruction also applies to Fleet Marine Force units under U.S. Navy cognizance, Military Sealift Command (MSC) shore commands, and those U.S. Naval Ships (USNS) (less foreign manned ships) and bare boat chartered ships that have been designated public vessels of the United States.

5. Discussion. This instruction was developed in compliance with references (a) and (b). It is the only OPREP-3 PINNACLE, OPREP-3 NAVY BLUE, and OPREP-3 NAVY UNIT SITREP guidance to be used by commands assigned to the U.S. Navy. Supplemental instructions by subordinate commands may amplify, but shall not modify the structure set forth in this instruction. There shall be no special incident or event reporting system other than that described in this directive.

   a. The OPREP-3 reporting system provides military units, at any level of command, a system to report significant events and incidents to the highest levels of command.

   b. The OPREP-3 PINNACLE series messages are used to report incidents that are of national-level interest to the National Military Command Center (NMCC).
c. The OPREP-3 WHITE PINNACLE system is used to exercise and evaluate the timeliness of OPREP-3 PINNACLE reporting procedures.

d. The OPREP-3 NAVY BLUE series messages are used to provide the Chief of Naval Operations (CNO), and other naval commanders, notification of incidents that are of high Navy vice national-level interest.

e. The OPREP-3 NAVY UNIT SITREP series messages are used to inform the operational commander, or appropriate higher authority, of incidents not meeting OPREP-3 NAVY BLUE criteria.

6. Review. CNO (N3/N5) is responsible for the periodic review and updating of this instruction.

7. Summary of Changes. Users of this instruction will find numerous editorial and technical changes. Changes include:

a. Alignment with reference (a), which updates usage of BROKEN ARROW and BENT SPEAR flagwords with Department of Defense (DoD) guidance, adds the WHITE PINNACLE exercise message, changes terminology from Commander in Chief (CINC) to Combatant Commander, and adds the Defense Messaging System (DMS) identifier for the Joint Staff.

b. Adopted reference (a)'s Joint Staff record message reporting standard of 60 minutes as the Navy standard.

c. Updated phone numbers and email addresses for Fleet Command Centers (FCCs), Navy Operations Center (NOC), NMCC, and U.S. Strategic Command (USSTRATCOM).

d. Action and Information addresses for each message have been updated.

e. Removed the distinction between national and local media interest as a threshold for OPREP PINNACLES, OPREP-3 NAVY BLUES, and OPREP-3 NAVY UNIT SITREPs. Any incident that generates media attention is now required to be reported as an OPREP-3 NAVY BLUE, at a minimum.

f. Updated reporting requirements to include notifying USSTRATCOM, when appropriate.

g. Updated reporting requirements for FADED GIANT reports. Nuclear reactor accidents will be reported as an OPREP-3 NAVY
BLUE FADED GIANT and significant radiological accidents, excluding those from nuclear weapon incidents, will be reported as an OPREP-3 NAVY BLUE. Nuclear weapon radiological accidents will continue to be reported as OPREP-3 PINNACLE BROKEN ARROW.

h. Added the use of DoD's TALON record message to terrorist threat information for incorporation into DoD’s terrorism threat warning process.

(1) Generated guidance for terrorist attacks to be reported via OPREP-3 PINNACLE FRONT BURNER.

(2) Generated guidance for specific terrorist incidents (e.g. security perimeter breach and bomb threats) to be reported via an OPREP-3 NAVY BLUE TALON message.

(3) Generated guidance for possible terrorist related incidents (e.g. threats, surveillance, and tests of security) to be reported via a NAVY UNIT SITREP TALON.

(4) Included an extensive list of TALON specific ACTION and INFO addees.

i. Updated OPREP-3 PINNACLE reporting requirements to include use of ordnance with the intent to destroy or disable (except against forces previously declared hostile by higher authority), incidents indicating use of chemical, biological, or radiological agents (to include anthrax), and loss of Top Secret (TS) material or equipment.

j. Updated OPREP-3 NAVY BLUE reporting requirements to include any incident that attracts media attention, use of ordnance with the intent to hit but not disable, computer intrusions that result in significant degradation of mission capability, and the loss of SECRET or CONFIDENTIAL material or equipment. Also, the appendices address Arms, Ammunition, and Explosive (AA&E) incidents, incidents of personnel misconduct, and Marine Mammal incidents.

k. Updated OPREP-3 NAVY UNIT SITREP reporting requirements to include use of live ordnance for warning shots, lesser incidents of personnel misconduct, negligent small arms weapons discharge, and fire or flooding incidents that result in minor damage.

1. Updated OPREP-3 NAVY BLUE and OPREP-3 NAVY UNIT SITREP reporting requirements for personnel misconduct incidents to
include domestic violence, domestic abuse, child abuse, child sexual abuse, sexual assault, sexual harassment, suicide and suicide attempts, hazing, and equal opportunity incidents.

m. Incorporated U.S. Message Text Format (USMTF) change from a two-digit year to a four-digit year in all fields containing dates, per reference (b)'s USMTF and Y2K standards.

n. Navy Center for Tactical Systems Interoperability (NCTSI), Navy's USMTF representative in the Joint community, has coordinated the following changes in support of Joint requirements:

(1) OPREP-3 NAVY BLUE messages have been incorporated into USMTF MIL-STD-6040 and they will be incorporated into the Common Message Processor (CMP).

(2) OPREP-3 NAVY UNIT SITREP replaces Navy's "UNIT SITREP." This updated terminology is being incorporated into the USMTF MIL-STD-6040 to ensure incorporation into CMP. "UNIT SITREP" is an already established Joint message report that does not provide the required information for Navy use, and is not available for Navy's use.

(3) OPREP-3 NAVY BLUE DULL SWORD messages are being incorporated into USMTF MIL-STD-6040 CY 2007 release and CMP.

o. DMS addressing and "grade of delivery" (message precedence) have been incorporated.

8. Points of contact by area of interest:

APPENDICES

APPENDIX A PERSONNEL INCIDENT REPORTS A-1
APPENDIX B ARMS, AMMUNITION, AND EXPLOSIVES (AA&E), MISSING, LOST, OR STOLEN INCIDENT REPORTS B-1
APPENDIX C MARINE MAMMAL INCIDENT REPORTS C-1
APPENDIX D ACRONYMS D-1
APPENDIX E GLOSSARY OF TERMS E-1
APPENDIX F REFERENCES F-1
1. **Purpose.** Incidents of national-level interest are to be reported to the National Military Command Center (NMCC) using the OPREP-3 PINNACLE message system. If in doubt about whether an occurrence is of national interest, the originator should send an OPREP-3 PINNACLE series report. Incidents of high-level U.S. Navy interest are to be reported to the Fleet Command Centers (FCC) and the Navy Operation Center (NOC) using the OPREP-3 NAVY BLUE reporting system. The OPREP-3 NAVY UNIT SITREP reporting system is used to report significant events or incidents that do not meet the OPREP-3 PINNACLE or OPREP-3 NAVY BLUE reporting criteria, or to augment these reports. The decision tree is displayed in Figure 1-1.

![Figure 1-1 Special Incident Decision Tree](image-url)

Figure 1-1 Special Incident Decision Tree
2. **Applicability.** This applies to all U.S. Navy units, Fleet Marine Force (FMF) units under U.S. Navy cognizance, Military Sealift Command (MSC) shore commands, and those U.S. Naval Ships (USNS) (less foreign manned ships) and bare boat chartered ships that have been designated public vessels of the United States. OPREP-3 reports will be submitted by the lowest level command that has knowledge of the event, except for those incidents where provision for rapid notification by a higher command has been established by separate directive. For reports involving nuclear weapons or nuclear weapon delivery systems, the commander of the organization having physical possession of the weapon/delivery system has the final responsibility for ensuring that the initial report is made.

3. **System Description**

   a. An initial Special Incident Report is normally the first indication to senior authority that an incident has occurred.

   b. The basis for the OPREP-3 reporting system is a set of jointly formatted voice and record messages used to transmit reports of special incidents to higher authority.

   c. The Joint Reporting Structure (JRS) is designed to allow for consistent transmission of reports by voice, electronic, or electrical record communications.

   d. The U.S. Message Text Formatting (USMTF) Program is designed to allow for the Joint, Coalition, and Allied standardization of message reporting as outlined below:

      (1) MIL-STD-6040, USMTF Guidance, provides templates and samples for the OPREP-3 reporting system's voice and record message reports.

      (2) This instruction is based on MIL-STD-6040's 2005 USMTF. Always use the most current MIL-STD-6040 USMTF User Formats release when generating voice or record message reports.

      (3) MIL-STD-6040 can be accessed at Defense Information System Agency's (DISA) website, https://disain.disa.mil/usmtf. Access is restricted; commands should request access from the DISA webpage. Follow instructions provided:

         (a) Click on "Request Access to the Private USMTF Website" to get a user ID and password.
(b) Log on and go to "USMTF Private Website."

(c) Access "USMTF Library", then go to the current version.

(d) The MIL-STD-6040 can then be downloaded or accessed on the website.

(e) Once MIL-STD-6040 is accessed, there are links for voice reports and message reports.

(4) The OPREP-3 NAVY BLUE and OPREP-3 NAVY UNIT SITREP reports have not yet been incorporated into MIL-STD-6040 USMTF Guidance. Both reports are based on the OPREP-3 message, with the exception of OPREP-3 NAVY BLUE DULL SWORD, which is based on the OPREP-3 PINNACLE BROKEN ARROW message. Sample messages are contained in this instruction. The flagword set, along with new primary (NAVY BLUE, NAVY UNIT SITREP) and secondary (TALON, DULL SWORD) flagwords, require manual input into the OPREP-3 series USMTF messages. Changes have been submitted to DISA for approval and incorporation into the message preparation software.

(5) The U.S. Navy's lead for MIL-STD-6040 is Navy Center for Tactical Systems Interoperability (NCTSI N3), 53690 Tomahawk Drive, San Diego, CA 92147-5082, SIPRNET email: n32@nctsi.navy.smil.mil. All message change requests should be submitted to NCTSI N3 for coordination with OPNAV N71, analysis, and possible incorporation into MIL-STD-6040.

e. Message Preparation Software

(1) When used properly, message processing software allows the drafter to produce correctly formatted USMTF messages per MIL-STD-6040. This eliminates creating messages in word processing programs or using text files that normally result in invalid or incorrectly formatted messages.

(2) Common Message Processor (CMP) is the Government-Off-The-Shelf (GOTS) Joint Service approved message processing software that will begin to replace Turboprep in FY05. Once CMP is phased into the system, it will become part of the enterprise-wide Navy Marine Corps Intranet (NMCI) Gold disk and will be on every NMCI seat in the Navy. Until then, Navy-unique messages, such as OPREP-3 NAVY BLUE and OPREP-3 NAVY UNIT
SITREP, will have to be manually generated using CMP or TURBOPREP.

(3) For non-NMCI users, CMP can be downloaded from:
USMTF Private website at https://disa.mil/usmtf/,
NCTSI NIPRNET website at https://www.nctsi.mil/, or
SECTION II - POLICY

1. The OPREP-3 reporting system will be the only external reporting system which the command will be concerned with until it checks out of the reporting system by filing its last OPREP-3 report for the incident. Critical Information (CRITIC) reports and MISHAP reports constitute exceptions to this policy and are further addressed in the RELATED REPORTS section of this chapter.

2. The OPREP-3 PINNACLE report is used by any unit to provide the NMCC and, as appropriate, Combatant Commands and Services, with immediate notification of any incident or event where national-level interest is indicated. Specific incidents are identified by a secondary flagword, such as NUCFLASH. Figure 1-2 provides general guidance. Incidents that require national-level notification which are not identified by a secondary flagword will be reported using the generic OPREP-3 PINNACLE report.

3. Where doubt exists as to whether an incident is of national or Navy interest, use the appropriate OPREP-3 PINNACLE series report.

4. The OPREP-3 NAVY BLUE report is used by Navy units to provide CNO and other naval commanders with immediate notification of incidents of military, political, or media interest that are high Navy, vice national-level interest. Specific incidents are identified by a secondary flagword, such as OPREP-3 NAVY BLUE TALON. Figure 1-3 provides general guidance. Incidents that require U.S. Navy notification, and which are not identified by a secondary flagword, will be reported using the generic OPREP-3 NAVY BLUE report.
INCIDENTS INVOLVING NUCLEAR COMPONENTS/DEVICES/WEAPONS

**An event involving radioactive material or radiation exposure not classified as a reactor incident, which presents or is expected to present a hazard to public health or safety.**

**Any unexpected occurrence involving a nuclear weapon or a component of a nuclear weapon, which does not fall into BIMBLE/HUNTO, BROKEN ARROW or EMPTY QUIVER categories.**

**An event involving a reactor accident involving naval nuclear reactors or other naval nuclear energy devices (excluding naval weapons) under custody of the Navy.**

**Any nuclear reactor accident involving naval nuclear reactors or other naval nuclear energy devices (excluding naval weapons) under custody of the Navy.**

**TERRORIST INCIDENT**

**Figure 1-3 OPREP-3 NAVY BLUE Series Flowchart**

1-7

FOR OFFICIAL USE ONLY
Figure 1-4 OPREP-3 NAVY UNIT SITREP Series Flowchart
SECTION III - TERRORIST INCIDENT REPORTING GUIDANCE

1. Terrorist threat information will be reported as follows:

   a. OPREP-3 PINNACLE. Since "TALON" is not a JRS flagword, terrorist incident reporting that meets PINNACLE criteria will use the OPREP-3 PINNACLE FRONT BURNER reporting system.

   b. OPREP-3 NAVY BLUE TALON and OPREP-3 NAVY UNIT SITREP TALON will be used for terrorist incidents being reported to Navy leadership per guidance provided in Chapters 4 and 5.

2. Per guidance provided in references (c) and (d), the Navy will use the secondary flagword "TALON" for OPREP-3 NAVY BLUE and OPREP-3 NAVY UNIT SITREP validated and non-validated terrorist incident reporting.

   a. The unique nature of the terrorist threat requires timely reporting and vigilant analysis of any suspected terrorist incident, including suspicious but ostensibly non-threatening activities, to recognize and detect pre-operational actions or the onset of an attack and to coordinate an effective response.

   b. Per Department of Defense (DoD) direction, references (c) and (d), the Navy has adopted the "TALON" operational reporting system as a means to capture validated and non-validated terrorist threat information and ensure that information will flow to analysts and be incorporated into the DoD terrorism threat warning process.

   c. A TALON report consists of raw information regarding suspicious incidents. Information in a TALON report may be non-validated, may or may not be related to an actual threat, and by its very nature may be fragmented and incomplete.

   d. The purpose of a TALON report is to document and immediately disseminate potential threat information to various military commands and government agencies. Examples of incidents requiring a TALON report include, but are not limited to:

      (1) Non-specific threats to DoD interests.
(2) Suspected surveillance of DoD facilities and personnel.

(3) Elicitation attempts, suspicious questioning, or other suspected intelligence collection activities focused on DoD interests.

(4) Tests of security.

(5) Unusual repetitive activity.

(6) Bomb threats.

(7) Any other suspicious activity or incident reasonably believed to be related to terrorist activity directed against DoD personnel, property, and activities.
SECTION IV - RELATED REPORTS

1. Critical Information (CRITIC) Reports. OPREP-3 reports do not replace the procedures for reporting CRITIC reports as defined in reference (e).

2. Other Joint reports addressed in reference (a), typically used by Unified or Combatant Commanders, and summarized in Chapter 3 Section IX, include OPREP-3 PINNACLE COMMAND ASSESSMENT, OPREP-3 PINNACLE LERTCON STATUS OF ACTIONS, Nuclear Detonations Summary Report (NUDETSUM) Reporting, and OPREP-3 CRESCENT EDGE.

3. Loss or compromise of classified information, material, or equipment
   a. These incidents, to include laptop computers, will be reported per Chapter 4, Section I and reference (f).
   b. If the loss or compromise of classified information results in the loss of, or significant degradation to, operational capability, then senior naval leadership needs to be informed via an OPREP-3 NAVY BLUE in addition to reports required by reference (f). Chapter 4 provides additional guidance.

4. Routine computer intrusion incidents
   a. Report per Chapter 4, Section I and reference (g).
   b. The Naval Computer Incident Response Team (NAVCIRT) provides a daily update to the NOC summarizing computer intrusion incidents that are minor in nature and do not result in a major degradation or loss of a command's ability to perform its mission.
   c. If the intrusion incident results in a loss or significant degradation to operational capability, then senior naval leadership needs to be informed via an OPREP-3 NAVY BLUE in addition to NAVCIRT's reporting requirements. Chapter 4 provides additional guidance.

5. Personnel incident reporting. These requirements have been closely coordinated with OPNAV N1 and references (h) through (q). Appendix A provides a generic reporting format for OPREP-3
NAVY BLUE or OPREP-3 NAVY UNIT SITREP personnel incident reports. If a personnel incident meets the reporting criteria of an OPREP-3 NAVY BLUE or OPREP-3 NAVY UNIT SITREP, then the Appendix A format will be used and no other messages are required.

6. **MISHAP Reports.** Requirements for MISHAP investigation and reporting are contained in references (r) through (v).

7. Reports contained in this directive are exempt from reports controlled by reference (w).
SECTION 1 - GENERAL GUIDANCE

1. Timeliness. The reporting standard for OPREP-3 PINNACLE, OPREP-3 NAVY BLUE, and OPREP-3 NAVY UNIT SITREP messages is:
   
a. Voice Report: within 5 minutes (for all OPREP 3 PINNACLE, NAVY BLUE and designated OPREP 3 NAVY SITREPS).

   b. Voice Reports for Personnel Incidents may require a phone call to the appropriate OPNAV N1 code within 24 hours. Appendix A amplifies.

   c. Record Message Report: within 60 minutes.

   d. Exercise WHITE PINNACLE: within 20 minutes. Requires a voice or record message response as directed in the WHITE PINNACLE exercise.

2. Initial Reports

   a. Initial voice and record message reports are not required to be complete reports; the emphasis of the report is on immediacy rather than content.

   b. These reports should address as many of the known line items as possible, but do not delay the report for lack of information.

   c. Where real-time secure chat capability exists between a unit and the FCC, a simultaneous chat report should be made with the initial voice report.

   d. Jointly approved formats and templates for voice and record message reports are provided in reference (b). In general, reports should address the following:

      (1) What happened?

      (2) Who is/was involved?

      (3) Where did it happen?

      (4) When did it happen?
(5) Why did it happen?

(6) What action is ongoing?

(7) What future action is contemplated?

(8) What is the impact on the command's mission capability?

(9) Is any assistance required?

(10) Is media attention anticipated?

3. Delayed Reports. Explain any delay in voice or record message reporting in the RMKS data set of the record message. The date-time group of the initial record message should be within the required reporting timeframe.

4. Precedence. Defense Messaging System (DMS) has standardized message addresses and grade of delivery across the services. Table 2-1 provides a cross-walk between the old message precedence and DMS' grade of delivery.

Table 2-1. Message Precedence and DMS Grade of Delivery Cross-Walk

<table>
<thead>
<tr>
<th>Precedence</th>
<th>DMS Grade of Delivery (X.400)</th>
<th>Speed of Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>FLASH</td>
<td>URGENT</td>
<td>3 minutes</td>
</tr>
<tr>
<td>IMMEDIATE</td>
<td>NORMAL</td>
<td>20 minutes</td>
</tr>
<tr>
<td>PRIORITY</td>
<td>NORMAL</td>
<td>20 minutes</td>
</tr>
<tr>
<td>ROUTINE</td>
<td>NON-URGENT</td>
<td>8 hours</td>
</tr>
</tbody>
</table>

a. Initial Reports

(1) FLASH/DMS URGENT: All OPREP-3 PINNACLE series reports and OPREP-3 NAVY BLUE FADED GIANT, OPREP-3 NAVY BLUE TALON reports may be sent "FLASH"/"URGENT" at the discretion of the Commanding Officer.

(2) IMMEDIATE/DMS NORMAL: All OPREP-3 NAVY BLUEs and OPREP-3 NAVY UNIT SITREPs.

b. Follow-up Reports
(1) FLASH/URGENT: OPREP-3 PINNACLE NUCFLASH, OPREP-3 PINNACLE FRONT BURNER, and OPREP-3 NAVY BLUE FADED GIANT. OPREP-3 NAVY BLUE TALON reports may be sent FLASH/URGENT, as appropriate.

(2) IMMEDIATE/NORMAL: All others

5. Minimize. All OPREP-3 reports are exempt from MINIMIZE conditions.

6. Classification. All OPREP-3 reports will be classified as follows:

   a. Overall Classification Level. Messages shall be marked in a manner similar to documents. Commands are responsible for ensuring that the overall classification marking on the message is the same as the highest classification level of the message content. Use the DECL set to provide downgrading and/or declassification instructions.

      (1) The reporting unit is responsible for assigning the proper security classification to each report, including downgrading or declassification instructions, according to the guidance in reference (f), and as reflected in the DECL set.

      (2) When combat or combat-related operational requirements make speed of delivery paramount, military commanders may modify transmission of classified information as necessary to meet local conditions. When so doing, they may, in a message, cite this subparagraph as the authority.

      (3) All message examples in this instruction are marked as UNCLASSIFIED for training purposes only.

   b. Portion markings. Add portion markings as required by reference (f). There is an exception to portion marking for pre-formatted messages that do not lend themselves to portion markings. However, when messages are merely free text, this exception would not apply. For example, GENTEXT, AMPN, NARR, and RMKS sets contain free text that permit portion marking.

   c. Restricted Data (RD) or Formerly Restricted Data (FRD). OPREP-3 reports containing RD or FRD, as defined in reference (f) must be identified in the classification line (e.g., CONFIDENTIAL FORMERLY RESTRICTED DATA).
SECTION II -VOICE MESSAGE REPORTS

1. Voice reports must be made to the appropriate FCC, the NOC, or NMCC to serve as a valid voice message report. Contact information is provided in Table 2-2. Ships at sea should report via the most rapid means available, including the appropriate Satellite High Command Network (SATHICOM).

2. Initial voice reports shall be made to the appropriate FCC, who will then notify the NOC. The NOC will notify NMCC and coordinate the appropriate voice report to United States Strategic Command (USSTRATCOM), as required.

3. USSTRATCOM requires a voice report by the U.S. Navy for appropriate OPREP-3 PINNACLE series, OPREP-3 NAVY BLUE BENT SPEAR, and OPREP-3 NAVY BLUE DULL SWORD reports.

4. Forces not assigned to a Fleet Commander should make reports to the NOC, who will then forward to NMCC and other appropriate commands.

5. Forces unable to reach the designated FCC or the NOC should make reports directly to the NMCC and request the NMCC relay to the NOC, and the NOC will relay to the designated FCC.

6. The voice message report may be abbreviated if operational security considerations make this absolutely necessary; however, the reporting command must carefully weigh the security considerations against the senior commands' need for timely information for each incident. Refer to the CLASSIFICATION paragraph in Chapter 2, Section I, for additional information.

2-6
SECTION III - RECORD MESSAGE REPORTS

1. The initial record message report of the event will reference the initial voice message report.

2. OPREP-3 NAVY BLUE TALON and OPREP-3 NAVY UNIT SITREP TALON Reports. Once a voice report is made to a FCC, a follow-up record message report is required. The only exception is if, and only if, within 30 minutes of the initial voice report of the incident, it is determined that a reportable event did not occur and only when no NOC, NMCC or Combatant Commander notifications were made by the FCC. The unit concerned will contact the FCC and provide the appropriate information. If the FCC agrees that the above parameters are met, the event may be closed out without a hardcopy message report.

3. References on the Message Report. Follow-up record message reports need NOT reference previously sent voice or record message reports because the messages are serialized.

4. Follow-up Reports. The follow-up report includes only the sections of the report that require additional information. The codeword FOLUP will be placed in the third field of the TIMELOC set. Precedence for follow-up reports is addressed in the PRECEDENCE paragraph of Chapter 2, Section I.

5. Initial and follow-up record message reports should address as many of the required data sets as possible, but do not delay the report to gather additional information.

6. Corrections to Reports. The originator will submit a new corrected message if an error is noticed after submitting a report. Identify a corrected report by placing "CORR" in the third field of the TIMELOC set.

7. Additional information to be considered for the GENTEXT or RMKS set follows:

   a. Commanding Officer's (CO) Assessment. Include in the RMKS data set, the CO's estimate of the situation, the impact of the incident on the mission capability of the reporting unit, the ability of the unit to operate safely, and if any assistance is required.
b. Serious injury or death of U.S. military personnel. Care must be taken to avoid reporting sensitive personal information that might cause unwarranted invasion of personal privacy of individuals.

(1) Generic identification such as "P01" or "20 YR OLD FEMALE E-3" will suffice. Do not use Social Security Numbers (SSNs).

(2) If detailed personal identity information is required, it should be provided separately in other than general messages, such as amplifying voice reports or limited distribution messages, such as "Personal For" or secure e-mail.

(3) In the case of injury or death of a servicemember, names will be withheld pending notification of next of kin, unless positive identification is deemed necessary. In such cases, the names can be listed provided the following statement is included: "FOR OFFICIAL USE ONLY. NEXT OF KIN HAVE NOT BEEN NOTIFIED."

c. Naval Criminal Investigation Service (NCIS) Involvement. Incidents requiring NCIS involvement will include a statement on the status of NCIS notification or participation.

d. Media Interest. Provide an assessment of the public affairs impact of any incident likely to generate significant public interest and provide information on any proposed news release. For all message reports, include one of the following statements:

MEDIA INTEREST ANTICIPATED, or
MEDIA INTEREST NOT ANTICIPATED

e. A statement indicating if a follow-up message report is expected.

(1) The initial message will sometimes be the final message. Additional messages may be required for amplifying information of the same significance.

(2) Amplifying information of lesser significance may be reported in OPREP-3 NAVY BLUES, OPREP-3 NAVY UNIT SITREPs, or other reports applicable to the incident.
8. Final Record Message Report. Review the MISHAP Reporting guidance to determine if the incident meets MISHAP reporting requirements. Only the final record message report will include a mandatory RMKS set, which shall include one of the following statements, as appropriate:

MISHAP REPORT NOT REQUIRED, or
MISHAP REPORT TO FOLLOW, or
MISHAP REPORT SUBMITTED

9. Serialization

a. Serialize all OPREP-3 report record messages using the message serial number field (Field 3) of the MSGID set.

b. Voice reports of an incident are not serialized.

c. All OPREP-3 report record messages, regardless of FLAGWORD, are serialized in sequence by incident, beginning with 001, which is assigned to the first incident of each calendar year. OPREP-3 reports use the same series of sequential serial numbers vice using one set of serial numbers for OPREP-3 PINNACLE reports and a separate set for OPREP-3 NAVY BLUE or OPREP-3 NAVY UNIT SITREP reports.

d. Additional record message reports concerning the same incident will be assigned sequential letter suffixes, i.e., 001A, 001B, 001C, etc. For example, the first record message report of a new incident will be serialized 002, with subsequent record message reports concerning this incident assigned successive suffixes, i.e., 002A, 002B, 002C.

e. At the end of the calendar year, if an incident requires amplifying reports, it shall continue with the serialization suffixes (010A, 010B, etc.) until the final report of the incident.

f. If an initial report is subsequently upgraded to an OPREP-3 PINNACLE or OPREP-3 NAVY BLUE, or downgraded to an OPREP-3 NAVY BLUE or OPREP-3 NAVY UNIT SITREP, the numbering sequence remains the same since the report is incident related.
10. Record Message Addresses

   a. Units reporting under this instruction shall report using their administrative title e.g., USS LA JOLLA vice CTE 35.1.3.5, in the "FROM" line of the message.

   b. Action and Information addressees are as listed in the Plain Language Address Directory (PLAD). DMS users should utilize appropriate distinguished name equivalents from the DMS Directory.

   c. All record message reports shall be addressed per the guidance provided in Chapters 3, 4, and 5.

   d. Responsibility for ensuring that all affected commands are informed of an incident rests with both the report originator and recipients.

   e. Recipients should review each report to determine whether additional addressees are required.
SECTION I - OPREP-3 PINNACLE (OPREP-3P)

1. Specific Reporting Instructions. The OPREP-3 PINNACLE will be used to report any event or incident that could attract national-level interest but is not specifically covered by other OPREP-3 reports. It is not restricted to reporting only operational information. The event or incident reported shall fall within one of the following categories:

   a. An occurrence of such impact that it requires the immediate attention of the Secretary of Defense (SECDEF) and Chairman of the Joint Chiefs of Staff (CJCS). Included are those occurrences that have actual or potential international repercussions, such as creation of tension or undesirable relations between the United States and other countries.

   b. Those occurrences having national-level interest that have or may significantly change current operations, involve natural or human-made disasters, or are civil disorders.

   c. Current DoD and Joint Chiefs of Staff (JCS) Execution Orders (EXORDs) as required by current guidance with specific attention to EXORDs directing worldwide operations against terrorists.

   d. In the U.S. Navy, Anti-Terrorism (AT)/Force Protection (FP) incidents that could attract national-level interest should be reported as an OPREP-3 PINNACLE FRONT BURNER.

   e. Any other incident when it is conceivable that the highest level of government will require timely notification. The following are provided as guidance and are not exhaustive in nature:

      (1) Major military, missile, or ordnance incidents (when nuclear warheads are not present).

      (2) Incidents involving reconnaissance activities.

      (3) Hijacking and related incidents.

      (4) Asylum incidents.

      (5) Receipt of critical intelligence.
(6) U.S. search and rescue operations in foreign countries and their Territorial Waters.

(7) Confirmed or suspected electronic attack, sabotage, and electromagnetic pulse events at tactical warning sensor sites, specified communication nodes, and command center locations.

(8) Grave breaches of International Law of Armed Conflict. For additional guidance on reporting grave breaches of the law of armed conflict, consult references (x) and (y). To report a violation of the Law of Armed Conflict that does not apparently constitute a grave breach, use an OPREP-3 NAVY BLUE.

(9) Any incident (except against forces previously declared hostile by higher authority) in which live ordnance is fired with the intent to destroy or disable, in response to a violation or suspected attempt to violate a U.S. Navy perimeter or maritime warning zone, including events in foreign ports. Regardless of intent, if personnel are injured or killed in the engagement, OPREP-3 PINNACLE notification is required.

(10) Territorial violations by U.S. forces, actual or presumed, except in confined water/air spaces such as the Arabian Gulf, if the violation was unintentional, of a short duration, and there was no reaction from the affected nation.

(11) Defection of U.S. or foreign personnel.

(12) Loss of, or substantial damage to, civilian property caused by military equipment, such as aircraft or ships, when national-level interest is indicated.

(13) Loss of, or substantial damage to, major military equipment, such as aircraft or ships, when national-level interest is indicated.

(14) Significant and unorthodox changes in the composition or structure of foreign governments.

(15) Any incidents indicating the use of chemical or biological agents, to include anthrax.

e. If doubt exists as to whether an event or incident is or could possibly develop into a matter of White House, Department of Defense, Joint Service, or media interest, submit an OPREP-3
PINNACLE report. Any occurrence reported as an OPREP-3 should be considered for submission as an OPREP-3 PINNACLE report unless a positive determination can be made to the contrary.

2. Report Content

   a. The OPREP-3 PINNACLE is a USMTF report. Instructions on USMTF voice and record message format and additional examples are contained in reference (b).

   b. For Peacetime Reconnaissance Reports, provide the nickname, mission number, and track number of the peacetime reconnaissance assignment being reported.

3. Voice Message Reports

   a. Initial voice reports shall be made within the timeframe specified.

   b. USSTRATCOM requires a voice report from Navy for certain incidents. The FCC or NOC will make this determination.

   c. The voice formats contain only the most important information and may not resemble the entire record version. For brevity, send only needed information. Each line in the main body of the message contains a line number that enables the message to be transmitted faster. Templates for all voice message reports are contained in reference (b).

   Line Number | Line Name | Line Description
   -----------|-----------|------------------
   Line One   | Incident  | Enter the incident identification, location, and details.
   Line Two   | Narrative | Enter any additional information about the incident.

SECTION II - OPREP-3 PINNACLE NUCFLASH (OPREP-3 PNF)

1. Specific Reporting Instructions. The OPREP-3 PINNACLE NUCFLASH is used to report an event, accident, or incident that could create the risk of a nuclear war. This message has the highest precedence in the OPREP-3 reporting structure. Report any of the following:

   a. Ballistic missile launch or space launch.

   b. Reentering space object.

   c. Loss, potential loss or degradation of U.S. military space capability when the loss or degradation is because of actions by a suspected or known hostile source.

   d. Reports of cruise missiles or non-friendly, non-U.S. or non-allied aircraft not on an approved flight plan that could pose a threat.

   e. Accidental, unauthorized, or any other unexplained incident involving possible detonation of a nuclear weapon.

   f. Unauthorized flight or deviation from an approved flight plan, by a nuclear-armed or nuclear-capable aircraft with the capability to penetrate the airspace of another nuclear-capable country.

2. Report Content

   a. This time-sensitive report must be made no later than five minutes after the incident and sent at FLASH/DMS URGENT precedence. The record communication follow-up message must be sent at FLASH precedence within 60 minutes of the incident.

   b. The OPREP-3 PINNACLE NUCFLASH is a USMTF report. Instructions on USMTF voice and record message format and additional examples are contained in reference (b).

   c. The following information, when applicable, will be reported. USMTF set identifiers for required information are included in parentheses.

      (1) Time and location of the occurrence and report type (TIMELOC).
(2) Time on target and unit involved (NUCTM). Used in initial reports.

(3) Impact or detonation location of the nuclear incident (NUCLOC).

(4) Weapon type, armament status, and warhead type (NUCTYP). Used in initial reports.

(5) Detonation location, aim point, travel direction, air speed, flight duration time, and time on target (NUCCRS). Used in amplifying reports.

3. Voice Message Reports

a. Initial voice reports shall be made within the timeframe specified.

b. USSTRATCOM requires a voice report from Navy for all OPREP-3 PINNACLE NUCFLASH reports. The FCC or the NOC will make this report.

c. The voice formats contain only the most important information and may not resemble the entire record version. For brevity, send only needed information. Each line in the main body of the message contains a line number that enables the message to be transmitted faster. Templates for all voice message reports are contained in reference (b).

<table>

SECTION III - OREP-3 PINNACLE FRONT BURNER (OREP-3PFB)

1. Specific Reporting Instructions. The OREP-3 PINNACLE FRONT BURNER report will be used to report:

   a. Any occurrence of armed attack, harassment, or hostile action against U.S. forces, territory, or interests. Armed attack includes terrorist attacks, suspected terrorist attacks, or hostile acts against U.S. shipping, interests or U.S. forces.

   b. Attacks against a nuclear site or attempts to penetrate a nuclear site perimeter.

   c. Expenditure of ordnance, after warning protocols have been exhausted, directed at approaching vessel or aircraft with the intent to destroy or disable (except those previously declared hostile by higher authority).

   d. An act, or attempt, of sabotage by foreign nationals against U.S. forces or installations.

   e. Significant hostile action between two or more foreign forces regardless of the nationalities involved.

2. Report Content

   a. The OREP-3 PINNACLE FRONT BURNER is a USMTF report. Instructions on USMTF voice and record message format and additional examples are contained in reference (b).

   b. The reporting activity must be sure to identify the type of event being reported (e.g., ship harassment, aircraft accident, border violation, possible terrorist incident).

3. Voice Message Reports

   a. Initial voice reports shall be made within the timeframe specified.

   b. USSTRATCOM requires a voice report from Navy for all OREP-3 PINNACLE FRONT BURNER reports. The FCC or the NOC will make this report.

   c. The voice formats contain only the most important information and may not resemble the entire record version. For brevity, send only needed information. Each line in the main
body of the message contains a line number that enables the message to be transmitted faster. Templates for all voice message reports are contained in reference (b).

<td>Line One</td>
<td>Incident</td>
<td>Enter information to identify incident and provide details.</td>
</tr>
<tr>
<td>Line Two</td>
<td>Narrative</td>
<td>Enter additional information needed to clarify or amplify information above.</td>
</tr>
</tbody>
</table>

When reporting terrorist incidents, include the following:

1. Date: Date the incident occurred.
2. Location: Where the incident occurred.
3. Short identifying title: What the report is about.
4. Details: Describe who, what, when, where, why, and how. Obtain all possible details for initial and follow-up reports.
5. Countries: What countries do the information in the report relate to. Actions taken.

Line Three Time Enter the day, hour, minute, time zone, month and year (DTG) for the message time of origin.

SECTION V - OPREP-3 PINNACLE EMPTY QUIVER (OPREP-3 PEQ)

1. Specific Reporting Instructions. The OPREP-3 PINNACLE EMPTY QUIVER report will be used to report the seizure, theft, or loss of a nuclear weapon per reference (z).

2. Report Content

   a. The OPREP-3 PINNACLE EMPTY QUIVER is a USMTF report. Instructions on USMTF voice and record message format and additional examples are contained in reference (b).

   b. The following information, when applicable, will be reported. USMTF set identifiers for required information are included in parentheses.

      (1) Date and time, location, and report status (TIMELOC).

      (2) Quantity and type of weapons and ship or aircraft identification (EVTYP).

      (3) Casualties and property damage (HEADING/CASUALTIES AND DAMAGES).

      (4) Incident cause and details (GENTEXT/INCIDENT CAUSE AND DETAILS).

      (5) Weapon condition and safety measures (GENTEXT/WEAPON CONDITION AND SAFETY MEASURES).

      (6) Amplifying information, including known or suspected route of diversion or escape, composition of recovery force, controlling authority, and communication links established with hot pursuit (recovery) team (GENTEXT/SEIZURE, THEFT, OR LOSS).

      (7) News releases (GENTEXT/NEWS RELEASES).

      (8) Public and political implications (GENTEXT/PUBLIC AND POLITICAL IMPLICATIONS).

      (9) Assistance required (GENTEXT/ASSISTANCE REQUIRED).

3. Voice Message Reports
a. Initial voice reports shall be made within the timeframe specified.

b. USSTRATCOM requires a voice report from Navy for all OPREP-3 PINNACLE EMPTY QUIVER reports. The FCC or the NOC will make this report.

c. The voice formats contain only the most important information and may not resemble the entire record version. For brevity, send only needed information. Each line in the main body of the message contains a line number that enables the message to be transmitted faster. Templates for all voice message reports are contained in reference (b).

<table>

SECTION VIII - OREP-3 WHITE PINNACLE (OPREP-3WP)

1. Specific Reporting Instructions. The OREP-3 WHITE PINNACLE is an unclassified exercise FLAGWORD used in exercise messages that contain simulated, time-critical information from operating forces to the NMCC. This exercise is used to measure the timeliness of the OREP-3 PINNACLE report.

   a. Upon receipt of a WHITE PINNACLE tasking, units will submit a WHITE PINNACLE acknowledgement report to the NMCC-Emergency Action (EA) cell by either voice or record copy, whichever is fastest.

   b. The time standard for WHITE PINNACLE exercises is 20 minutes, measured from the communications origination time, i.e., when the unit operations center/command center or duty officer receives the WHITE PINNACLE tasking, to time of receipt by the NMCC.

   c. Direct voice contact between the tasked units and the NMCC is the goal when voice circuits are used using the NMCC phone numbers listed in the phone matrix in Table 2-1.

   d. No record copy message traffic is required when the WHITE PINNACLE exercise is successfully completed using voice contact.

   e. When a WHITE PINNACLE acknowledgement report is received by multiple methods, as long as at least one acknowledgement meets the 20-minute time criteria, the exercise will be considered successful.

   f. NMCC-EA will investigate all unsatisfactory EXERCISE WHITE PINNACLES and provide a copy of the results of their investigation to the Regional Operations Support Division (ROSD), Operations, Training, and Evaluation (OT&E) Branch prior to the on-duty OT shift change.

   g. NMCC-EA will notify the originating command center when the WHITE PINNACLE exercise is completed.

2. Report Content. The following information will be included in the OREP-3 WHITE PINNACLE report:

   a. Unit tasked to exercise WHITE PINNACLE procedures.
b. Location (if not classified). This information may assist in determining locations that may preclude timely reporting.

c. Tasking Combatant Commander.

d. DTG of the tasking message or voice notification to unit.

e. Unit Time of Receipt (TOR).

f. Message acknowledgement that exceeds the 20-minute time criteria will contain information addressing any known delays or initiate tracer action, as appropriate. A follow-up message to the NMCC-EA will provide results on any tracer action initiated.

g. Use precedence of "FLASH"/DMS "URGENT" for all record copy transmissions.

3. Voice Message Reports

a. Initial voice reports shall be made within the timeframe specified.

b. The voice formats contain only the most important information and may not resemble the entire record version. For brevity, send only needed information. Each line in the main body of the message contains a line number that enables the message to be transmitted faster. Templates for all voice message reports are contained in reference (b).

SECTION IX - OPREP-3 RELATED REPORTS

Additional information and reporting requirements for the below reports are contained in references (a) and (b).

1. OPREP-3 PINNACLE/COMMAND ASSESSMENT (OPREP-3PCA). Used by a combatant commander to report the assessment of a developing or potential crisis situation.

2. OPREP-3 PINNACLE/LERTCON STATUS OF ACTION (OPREP-3LSOA). Used to immediately notify the NMCC of a combatant commander's actions relative to changes in the alert condition (LERTCON) of forces.

3. OPREP-3 CRESCENT EDGE (OPREP-3CE). Used by any unit to advise Special Access Program (SAP) program managers of events or incidents that meet OPREP-3 reporting criteria.

4. NUDETSUM Reporting Procedures. Used to report information pertaining to nuclear detonations in areas outside the North American continent. Nuclear detonations on the North American continent will be reported by USSTRATCOM.
SECTION I - OPREP-3 NAVY BLUE

1. Specific Reporting Instructions. The OPREP-3 NAVY BLUE report is used by any unit to provide the CNO and other naval commanders with immediate notification of incidents of military, political, or media interests that are of high Navy, vice national level, interest and have been categorized into operational incidents, AT/FP incidents, personnel incidents, and other incidents. The reports are to be submitted to provide "as it happens" information to the chain of command.

a. Major Incidents. The below list of incidents for such events as fire/flooding, computer intrusion, and loss/compromise of classified information indicate that an OPREP-3 NAVY BLUE is required if the incident is considered to be "major." If it is not "major," then it is to be reported as an OPREP-3 NAVY UNIT SITREP. For the purpose of this instruction, a major incident is defined as an incident that results in loss or degradation in the ability of a command to perform its mission, as determined by the Commanding Officer. If in doubt, report as an OPREP-3 NAVY BLUE.

b. AT-related incidents will be reported using OPREP-3 NAVY BLUE TALON or OPREP-3 NAVY UNIT SITREP TALON.

c. Operational Incidents

(1) Fires, flooding, explosions, collisions, groundings, or other major incidents to Navy ships, submarines, aircraft, or MSC vessels resulting in major damage to spaces, equipment, or injury/death to personnel.

(2) Near or actual collisions of minor significance involving Navy ships or aircraft. (For near or actual collisions of major significance, report as an OPREP-3 PINNACLE.)

(3) Any other major incidents, as defined in paragraph 1.a., involving damage to Navy or MSC ships and aircraft.

(4) Class A or B Aircraft MISHAPs (if not reportable by an OPREP-3 PINNACLE).
(5) Initial report of a submarine incident (SUBMISS/SUBSUNK).

(6) The loss at sea of any Navy vessel, Rigid Hull Inflatable Boat (RHIB), or other small craft.

(7) Aggressive actions by foreign entities towards USN ships or aircraft.

(8) Any incident (except against forces previously declared hostile by higher authority) in which live ordnance is expended, with the intent to hit but not disable, in response to a violation or suspected attempt to violate a U.S. Navy perimeter or maritime warning zone, including events in foreign ports. Regardless of intent, if personnel are injured or killed in the engagement, or the vessel is disabled, an OPREP-3 PINNACLE notification is required.

(9) Any incident where warning shots are fired in support of counter drug operations.

(10) Search and Rescue (SAR) incident's initial report, to include SARs that are in the alert or uncertainty phase. (The OPREP-3 NAVY UNIT SITREP will be used to provide daily updates to the chain of command.)

(11) Unintentional launch of a missile, torpedo, or other live ordnance.

(12) Actual or suspected duress situation or unusual occurrence affecting any nuclear capable unit.

(13) Any discharge of a government weapon that causes a fatality or injury to personnel. (Negligent discharges that do not meet this criteria will be reported as an OPREP-3 NAVY UNIT SITREP.)

(14) Acts or attempts to willfully destroy property of the Navy.

d. Personnel Incidents

(1) Death of, critical injury to, or missing Commanding Officers or senior officials (flag officer or equivalent).
(2) Incidents involving death or injury to personnel embarked in Navy or MSC ships and aircraft.

(3) Incidents involving death, serious injury, or serious illness in which the adequacy of medical care is reasonably in question.

(4) Death or serious personal injury of a civilian; this includes civilian traffic accident deaths caused by a service member.

(5) Significant misconduct, or lesser incidents that may be reported by the media, committed by military personnel including, but not limited to the items below (refer to Appendix A for additional guidance, action/information addressees, and specific message format requirements):

(a) Murder

(b) Rape, Forcible Sodomy

(c) Armed Robbery

(d) Aggravated Assault/Assault with a Deadly Weapon

(e) Kidnapping

(f) Carjacking

(g) Burglary of an Occupied Dwelling

(6) Lesser misconduct may require an OPREP-3 NAVY BLUE report. The below listed misconduct will be reported using an OPREP-3 NAVY BLUE report if there is media attention. If there is no media attention, then report using an OPREP-3 NAVY UNIT SITREP (refer to Appendix A for additional guidance):

(a) Domestic Violence

(b) Domestic Abuse

(c) Child Abuse/Neglect

(d) Child Sexual Abuse

(e) Indecent Assault
(f) Assault with intent to commit rape or sodomy

(g) Sexual Harassment - formal complaint or report

(h) Suicide and Suicide attempts. Suicidal gestures will be reported as an OPREP-3 NAVY UNIT SITREP

(i) Equal Opportunity Incidents - formal complaint or report

(j) Unlawful Discrimination

(k) Hazing

Note: Definitions of the listed crimes can be found in reference (q). Some definitions are also included in Appendix A.

e. Incidents of Missing, Lost, or Stolen (MLS) Arms, Ammunition, or Explosives (AA&E). See reference (aa) and Appendix B for amplifying guidance.

f. Marine Mammal Incidents. See reference (ab) and Appendix C for amplifying guidance to report confirmed or unconfirmed ship-whale strike, stranding or other marine mammal incidents. The following constitutes marine mammal events:

1. Whale strike by a U.S. Navy ship.

2. Any stranding that involves a Northern Right Whale or Beaked Whale.

3. Any other stranding that is reported by a Navy ship or aircraft in which the unit knows that naval operations, exercises or training involving active sonar or weapons impact have occurred within 50 nautical miles of the stranding and within three days prior to the sighting.

4. Stranding for which a request for information on naval operations has been received from Congress, National Marine Fisheries Service (NMFS), or the media.

5. Stranding for which naval operations have been implicated, or are likely to be implicated, as causing the event, per Appendix E of reference (ab).
(6) Claims of unusual marine mammal behavior reported in the media, or by National Marine Fisheries Service, a private party or non-governmental entity in which naval operations, exercises or training have been implicated. See Appendix E of reference (ab) for further guidance.

g. Other Incidents

(1) Discharges or spills of material or fluids that might be considered pollutants which endanger critical water areas, have the potential to generate public concern, become the focus of enforcement action, or pose a threat to public health or welfare.

(2) Loss or possible compromise of TOP SECRET, SECRET, or CONFIDENTIAL material or equipment, to include information technology equipment such as a laptop or Personal Digital Assistant (PDA), that results in the loss of, or significant degradation to, operational capability, or could possibly impact other U.S. Forces. Reporting requirements as identified in reference (f) also remain in effect.

(3) Computer intrusion event that results in the loss of, or significant degradation to, operational capability. Reference (g) reporting requirements also remain in effect.

(4) All serious events/incidents in Japan involving military personnel and their dependents; or events/incidents involving host nation personnel that could generate media or political interest.

(5) Violation of the letter or spirit of the US-Russia agreement for prevention of incidents on and over the high seas per reference (ac).

(6) Significant damage to civilian property resulting from actions by members of the Department of the Navy.

(7) Labor strikes which may significantly impair operational readiness, high priority industrial production for U.S. Navy projects, or mobility.

(8) Disorders or natural disasters of minor significance, if naval assistance is provided or requested.
(9) Disease diagnosis of potential epidemic significance or the presumptive diagnosis of any disease that could result in a quarantine of naval personnel to the extent that it may be an operational impact.

(10) Fraud, waste, abuse, gross inefficiency, or mismanagement that could involve high-level naval interest or national media inquiry.

(11) An event involving radioactive material or radiation exposure not classified as a reactor accident under OPREP-3 NAVY BLUE FADED GIANT, but which presents, or is expected to present, a hazard to public health and safety, or is of such a nature as to warrant immediate notification of cognizant higher commands.

(a) Included in this category are those events having domestic or international implications and those that are likely to give rise to inquiries by the public or the press.

(b) Inadvertent discharges of reactor coolant from naval reactor propulsion plants do not warrant notification under this section, but should be reported under references (ad) and (ae).

(12) Possible suspected or alleged violation of the law of armed conflict that does not apparently constitute a grave breach. For additional guidance on reporting violations of the law of armed conflict, see references (x) and (y). To report a grave breach of the law of armed conflict, use an OPREP-3 PINNACLE.

h. Any incident of high-level Navy interest which does not fall into the category of any other report in the OPREP-3 PINNACLE or OPREP-3 NAVY BLUE series.

2. Report Content. The OPREP-3 NAVY BLUE report is a USMTF based report that is being incorporated into reference (b). It is based on the OPREP-3 message. The message example is edited accordingly.

a. In general, voice and record message reports should address the following:

(1) What happened?
(2) Who is/was involved?
(3) Where did it happen?
(4) When did it happen?
(5) Why did it happen?
(6) What action is ongoing?
(7) What future action is contemplated?
(8) What is the impact on the command's mission capability?
(9) Is any assistance required?
(10) Is media attention anticipated?
(11) Command Point of Contact (POC) information.

b. The following incident reports require additional specific information in the GENTEXT/INCIDENT IDENTIFICATION AND DETAILS section of the record message:

(1) Aircraft incident reports shall include:
   
   (a) Aircraft model, Bureau Number (BUNO), reporting custodian, and custodian location.

   (b) Pilot's name, rank, injury code (if known), and the number of other persons on board and their injuries.

   (c) Mission and phase of operations, e.g., taxi, takeoff, in flight, approach, landing.

(2) Personnel Incident Report. Appendix A refers.

(3) AA&E Incident Report. Appendix B refers.

3. Voice Message Reports

   a. Initial voice reports shall be made within the timeframe specified.
b. Include as much of the above information in the initial voice report, but do not delay the initial report to gather additional information. The above information will be addressed in the initial and amplifying record messages.

c. USSTRATCOM requires a voice report from Navy for certain incidents. The FCC or NOC will make this determination.

d. The voice formats contain only the most important information and may not resemble the entire record version. For brevity, send only needed information. Each line in the main body of the message contains a line number that enables the message to be transmitted faster. Templates for all voice message reports are contained in reference (b).

SECTION II - OPREP-3 NAVY BLUE TALON

1. Specific Reporting Instructions. The OPREP-3 NAVY BLUE TALON is used by any unit to provide CNO, other naval commanders, and other non-Navy AT related commands and government agencies with immediate notification of any terrorist incident or event of high Navy and, possibly, national interest.

   a. The unique nature of the terrorist threat requires a timely alert and analysis of any suspected terrorist incidents, including suspicious, but ostensibly non-threatening activities, to recognize and detect pre-operational actions or the onset of an attack. This is critical in coordinating an effective response.

   b. The alert, analysis, and response must occur across and among a large inter-agency mix. Submit an OPREP-3 NAVY BLUE TALON to provide “as it happens” information. The event or incident may fall within one of the following categories:

      (1) Any intentional or willful actual breach of a security perimeter, including confirmed swimmer sightings where there is a threat to facility security.

      (2) Any incident where warning shots are fired in support of homeland security.

      (3) Bomb threats that are evaluated by the reporting officer as probably valid. A bomb threat is communicated by any means and specifically threatens to use a bomb to attack U.S. Navy or U.S. forces, facilities, or missions. Use an OPREP-3 NAVY UNIT SITREP TALON for bomb threats determined to be a hoax. If uncertain, report as an OPREP-3 NAVY BLUE/TALON.

2. Report Content

   a. The OPREP-3 NAVY BLUE TALON is a USMTF based report that is being incorporated into reference (b). It is based on the OPREP-3 message. The message example is edited accordingly.

   b. The voice message report's NARRATIVE and the record message report's GENTEXT/INCIDENT IDENTIFICATION AND DETAILS section should contain the following information. Again, DO NOT DELAY AN INITIAL REPORT TO GAIN ADDITIONAL INFORMATION. Additional information may be submitted in subsequent reports:

   FOR OFFICIAL USE ONLY
(1) Date: Date the incident occurred.

(2) Location: Where the incident occurred.

(3) TALON Criteria: For example, specific threat, surveillance, elicitation, test of security, repetitive activity, bomb threat, suspicious activity or incident.

(4) Short Identifying Title: What the TALON is about.

(5) Source and Assessment of Credibility: Who provided the information, how credible is the source, and why do you assess the source that way.

(6) Details: Describe who, what, when, where, why, and how. Obtain all possible details of suspect(s) or suspected incident for initial and follow-up reports (including craft or vehicle information, license plates, etc.). Provide specific information on what any sources said and about what any sources did not know.

(7) Countries: What countries does the information in the TALON relate to.

(8) Persons Briefed Locally: Who was briefed locally, and when were they notified of the incident.

(9) Actions Taken: Include types and amounts of ordnance expended, if required.

(10) Comments: Provide any additional information, including any personnel or material casualties.

(11) Persons Involved: e.g., subjects, witnesses, incidentals.

(12) POC: Name/Phone Number/Email.

c. The following specific information is required in the RMKS/COMMANDER'S COMMENTS section of the record message:

Commander's Comments. Include the Commanding Officer's estimate of the situation, the impact of the incident on the reporting unit, and the ability of the unit to operate. Note the status of NCIS notification/participation. Indicate if any media interest in the incident or press release is expected to be generated from the incident.
3. Voice Message Reports

   a. Initial voice reports shall be made within the timeframe specified.

   b. The FCC or the NOC will notify senior Navy or national leadership, as required by the nature of the incident report.

   c. Voice message formats are the same as for the OPREP-3 NAVY BLUE.

   d. Voice Message Report Example

      DIAMOND HEAD THIS IS WINDSTAR OPREP THREE NAVY BLUE TALON OVER
      WINDSTAR THIS IS DIAMOND HEAD SEND OPREP THREE NAVY BLUE TALON

      TO REACHING GATE
      OVER

4. Record Message Reports

   a. Initial record message reports shall be made within the timeframe specified.

   b. Follow-up message reports must evaluate the incident in the judgment of the on-scene commander and available intelligence and make a determination if the event represented an actual threat or an innocent event prior to closing out the OPREP-3 NAVY BLUE TALON.

   c. Message Text Format data sets are the same as for the OPREP-3 NAVY BLUE. The FLAGWORD set, FLAGWORD/NAVY BLUE/TALON//, must be manually added to the message after the REF set.

   d. Record Message Example
TIMELOC/171525ZAUG2002/NORFOLK/INIT//

4. SHORT IDENTIFYING TITLE: SURVEILLANCE OF GATE TWO NAVAL STATION NORFOLK
5. SOURCE AND ASSESSMENT OF CREDIBILITY: GATE SENTRY/HIGH CREDIBILITY
6. DETAILS: GATE SENTRY REPORTED VEHICLE IN LINE AT GATE VIDEO TAPING SECURITY PROCEDURES. VEHICLE APPEARED TO HAVE TWO MALE OCCUPANTS; BOTH MAY HAVE BEEN OF MIDDLE EASTERN DESCENT. PASSENGER HAD VIDEO CAMERA AND APPEARED TO BE VIDEO TAPING GATE SENTRY PROCEDURES. JUST PRIOR TO APPROACHING THE GATE AND HAVING TO SHOW ID, VEHICLE EXITED THE LINE AND SPED AWAY AT HIGH SPEED.
7. COUNTRIES: U.S.
8. PERSONS BRIEFED LOCALLY: N/A
9. ACTIONS TAKEN: PASSENGER AND VEHICLE DESCRIPTION, INCLUDING LICENSE PLATE, PROVIDED TO NCIS.

10. COMMENTS: N/A

11. PERSONS INVOLVED: MA1 SMITH (GATE SENTRY)

12. POC: D TAILOR, NAVAL STATION NORFOLK, DSN:555-1212, EMAIL: D.TAILOR@NAVY.MIL/

RMKS/COMMANDER'S COMMENTS/NO IMPACT ON ABILITY TO CONTINUE MISSION. NCIS NOTIFIED AND ON SCENE. NO MEDIA INTEREST LIKELY./
SECTION III - OPREP-3 NAVY BLUE BENT SPEAR

1. Specific Reporting Instructions. The OPREP-3 NAVY BLUE BENT SPEAR report is used by any unit to report to the CNO and appropriate naval commanders any U.S. nuclear weapons or nuclear system incident, not reportable as an OPREP-3 PINNACLE NUCFLASH, BROKEN ARROW, or EMPTY QUIVER, that could:

   a. Bring the safety or control of a nuclear weapon into doubt.

      (1) Increases the probability of explosion or radioactive contamination.

      (2) Requires assessment, examination, or recertification by Department of Energy (DOE)/National Nuclear Security Administration (NNSA).

      (3) Results in the partial or complete unauthorized arming or initiation of a firing sequence.

      (4) Results in the knowledge or suspicion that a nuclear weapon has been partially or fully armed.

   b. Require immediate action in the interest of safety or nuclear weapon security (e.g. weapon security incidents such as a Permissive Action Link (PAL) anomaly).

   c. Result in, or have the potential to result in, adverse public reaction.

   d. Lead to nuclear weapon incident category events or warrant the informational interest or action of any of the following officials or agencies:

      (1) Joint Forces Commander.

      (2) Appropriate Military Department or Service.

      (3) Under Secretary of Defense (Acquisition, Technology, and Logistics).

      (4) Assistant Secretary of Defense (International Security Affairs).

      (5) Assistant Secretary of Defense (Public Affairs).
(6) Federal Emergency Management Agency (FEMA) (incident located in the USA).

(7) NNSA

2. Report Content

   a. The OPREP-3 NAVY BLUE BENT SPEAR is a USMTF based report that is being incorporated into reference (b). It is based on the OPREP-3BS report. The message example is edited accordingly.

   b. Per reference (a), the flagword PINNACLE may be added at any level of command to expedite forwarding of this message to NMCC J3.

   c. The weapon identification and configuration are classified. If this report is submitted over unclassified communications, a line number in reference (z) will be used.

3. Voice Message Reports

   a. Initial voice reports shall be made within the timeframe specified.

   b. USSTRATCOM requires a voice report from Navy for OPREP-3 NAVY BLUE BENT SPEAR reports. The FCC or the NOC will make this report.

   c. The voice formats contain only the most important information and may not resemble the entire record version. For brevity, send only needed information. Each line in the main body of the message contains a line number that enables the message to be transmitted faster. Templates for all voice message reports are contain in reference (b).

SECTION IV – OPREP-3 NAVY BLUE FADED GIANT

1. Specific Reporting Instructions

a. The NAVY BLUE FADED GIANT report is used by any unit to provide the CNO and other Naval and Combatant Commanders with immediate notification of any nuclear reactor accident involving naval nuclear propulsion reactors or radiological accident involving naval nuclear reactors, other naval nuclear energy devices (excluding nuclear weapons), or radioactive materials under custody of the U.S. Navy. Such accidents are defined in reference (ae) as follows:

   (1) NUCLEAR REACTOR ACCIDENT. An uncontrolled reactor criticality resulting in damage to the reactor core or an event such as a loss of coolant which would likely result in the release of fission products from the reactor core.

   (2) RADIOLOGICAL ACCIDENT. A loss of control of radioactive material which presents a hazard to life, health, or property, or which may result in any member of the general population exceeding exposure limits for ionizing radiation.

   (3) An event involving radioactive material or radiation exposure that does not constitute a radiological accident, but is of such a nature as to warrant immediate notification of cognizant higher command, shall be reported by OPREP-3 NAVY BLUE.

b. Accidents or incidents involving nuclear weapons shall not be reported here, but will use the appropriate OPREP-3 PINNACLE series report.

2. Report Content

a. Per reference (a), the flagword PINNACLE may be added at any level of command to expedite forwarding of this message to NMCC J3.

b. The OPREP-3 NAVY BLUE FADED GIANT is a USMTF based report that is being incorporated into reference (b). It is based on the OPREP-3FG message. The message example is edited accordingly.

3. Voice Message Reports

a. Initial voice reports shall be made within the timeframe specified.
b. The FCC or the NOC will determine if USSTRATCOM requires notification; the FCC/NOC will then notify USSTRATCOM if appropriate.

c. The voice formats contain only the most important information and may not resemble the entire record version. For brevity, send only needed information. Each line in the main body of the message contains a line number that enables the message to be transmitted faster. Templates for all voice message reports are contain in reference (b). Voice reports for nuclear reactor accidents involving naval nuclear propulsion reactors do not require the use of Line 3 and Lines 8-23. All other voice reports required by this section may use these lines, as applicable.

SECTION V - OPREP-3 NAVY BLUE DULL SWORD

1. Specific Reporting Instructions. The OPREP-3 NAVY BLUE DULL SWORD report is used by any unit to provide CNO and other naval commanders with immediate notification of any unexpected event involving a nuclear weapon/component (including war reserve, test, training weapons, or associated test and handling equipment).

   a. This report is for any unexpected occurrence involving nuclear weapons or nuclear components that is not a nuclear incident but meets one of the following criteria:

      (1) The possibility of detonation or radioactive contamination is increased.

      (2) Errors are committed in the assembly, testing, loading, or transporting of equipment which could lead to substantially reduced yield, increased dud probability, or to unintentional operation of all or part of a weapon's arming and/or firing sequence.

      (3) The malfunctioning of equipment and material which could lead to a substantially reduced yield, increased dud probability, or to unintentional operation of all or part of a weapons arming and/or firing sequence.

      (4) Any natural phenomenon over which man has no control that results in damage to a weapon or component.

      (5) Any unfavorable environment or condition, however produced, which subjects a nuclear weapon to vibration, shock, stress, extreme temperature, or other environment sufficient to cause questioning of the reliability or safety of the weapon. This includes exposure or suspected exposure of the weapon or major components to electrical or electromagnetic energy that could energize or damage weapon components.

   b. This message format is the same as the OPREP-3 PINNACLE BROKEN ARROW. Thus, the flagword PINNACLE may be added at any level of command to expedite forwarding of this message to NMCC J3.

2. Report Content
a. The OPREP-3 NAVY BLUE DULL SWORD is a USMTF based report that is being incorporated into reference (b). It is based on the OPREP-3 PBA message. The message example is edited accordingly.

b. The weapon identification and configuration are classified. If this report is submitted over unclassified communications, a line number in reference (z) will be used.

3. Voice Message Report

a. Initial voice reports shall be made within the timeframe specified.

b. USSTRATCOM requires a voice report from Navy for all OPREP-3 NAVY BLUE DULL SWORD reports. The FCC or the NOC will make this report.

c. Voice message formats are the same as for the OPREP-3 PINNACLE BROKEN ARROW.

d. Voice Message Report Example

CHAPTER 5 - OPREP-3 NAVY UNIT SITREP REPORT

SECTION I - OPREP-3 NAVY UNIT SITREP

1. Specific Reporting Instructions

a. The OPREP-3 NAVY UNIT SITREP is used by any U.S. Navy Commanding Officer, Officer-in-Charge, or other commander (as directed or appropriate) to provide the Immediate Superior in Command (ISIC) and appropriate Navy operational commanders and higher authority with timely notification of any incident not meeting OPREP-3 PINNACLE or OPREP-3 NAVY BLUE special incident reporting criteria.

b. The decision to submit an OPREP-3 NAVY UNIT SITREP vice an OPREP-3 NAVY BLUE report for the below list of personnel incident reporting criteria is driven by potential media interest. For clarification of definitions for potential crimes, refer to Appendix A and reference (q).

c. Major Incidents. The below list of incidents for such events as fire/flooding, computer intrusion, and loss/compromise of classified information indicate that an OPREP-3 NAVY BLUE is required if the incident is considered to be "major." If it is not "major," then it is to be reported as an OPREP-3 NAVY UNIT SITREP. For the purposes of this instruction, a major incident is defined as an incident that results in loss or degradation in the ability of a command to perform its mission, as determined by the Commanding Officer. If in doubt, report as an OPREP-3 NAVY BLUE.

d. AT-related incidents that do not meet the criteria for an OPREP-3 NAVY BLUE TALON will be reported using OPREP-3 NAVY UNIT SITREP TALON.

e. The below listed incidents warrant an OPREP-3 NAVY UNIT SITREP be submitted to the ISIC:

(1) When considered appropriate by the reporting activity.

(2) When directed.

(3) To update incidents previously reported via OPREP-3 NAVY BLUE when the update information does not meet OPREP-3 NAVY BLUE criteria.
(4) Operational incidents that do not attract media attention.

(a) Any small arms weapons discharge that is unauthorized, accidental, or negligent that does not result in injury or death.

(b) Fires or floods or fire resulting in minor damage or does not cause significant personnel injury or loss of combat capability.

(c) Any incident (except against forces previously declared hostile by higher authority) in which live ordnance warning shots, excluding pyrotechnics, are fired without the intent to hit or disable, in response to a violation or suspected attempt to violate a U.S. Navy perimeter or maritime warning zone, including events in foreign ports. Regardless of intent, if personnel are injured or killed in the engagement, or the vessel is disabled, OPREP-3 PINNACLE notification is required. If the vessel is hit but not disabled, an OPREP-3 NAVY BLUE notification is required. Fleet Commanders will determine if events are of sufficient significance to issue an OPREP-3 NAVY BLUE based on similar previous events in that Area of Responsibility (AOR.).

(d) Minor liberty incidents in which a service member is arrested or held for non-serious offenses by local or foreign authorities.

(e) Minor liberty incidents in a foreign port that may result in payment of a foreign claim.

(5) Personnel Incidents. See also Appendix A, Personnel Incident Reports, for amplifying guidance and action/information addressees. If media interest is anticipated in any of the below misconduct incidents, it should be reported via an OPREP-3 NAVY BLUE. If media interest is not anticipated, an OPREP-3 NAVY UNIT SITREP will be used.

(a) Domestic Violence

(b) Domestic Abuse

(c) Child Abuse/Neglect

(d) Child Sexual Abuse
(e) Indecent Assault

(f) Assault with intent to commit rape or sodomy

(g) Sexual Harassment - formal complaint or report

(h) Suicide and Suicide attempts

(i) Suicidal gestures will be reported as an OPREP-3 NAVY UNIT SITREP

(j) Equal Opportunity Incidents - formal complaint or report

(k) Unlawful Discrimination

(l) Hazing

(6) Other incidents:

   (a) Follow-up reports of labor strikes affecting Navy facilities or the construction of a ship.

   (b) Minor fraud, waste, or abuse.

2. Report Content. The OPREP-3 NAVY UNIT SITREP is a USMTF based report that is being incorporated into reference (b). It is based on the OPREP-3 message. The message example is edited accordingly.

   a. In general, voice and record message reports should address the following:

      (1) What happened?

      (2) Who is/was involved?

      (3) Where did it happen?

      (4) When did it happen?

      (5) Why did it happen?

      (6) What action is ongoing?

      (7) What future action is contemplated?
(8) What is the impact on the command's mission capability?

(9) What assistance is required?

(10) What media attention is anticipated?

(11) Command POC information?

b. Additional specific information is required in the GENTEXT/INCIDENT IDENTIFICATION AND DETAILS section of the record messages when reporting incidents of:

(2) Negligent Discharge of a Firearm: Contents for a negligent discharge of a government-owned firearm, which does not result in injury or death to personnel, shall include the following information:

(a) Date/time/location of the discharge.

(b) Type of weapon discharged/number of rounds (include manufacturer and model number).

(c) Damage (if any) caused by the discharge.

(d) Rate/rank/grade and duty position of the person who discharged the weapon.

(e) Date last qualified on the weapon.

(f) Date last use of force and safety training completed.

(g) Type of investigation being conducted (internal, NCIS, etc.).

(h) Narrative of the events surrounding the incident and ongoing action.

(i) POC: Name/Phone Number/Email.

c. Serious injury of U.S. military personnel
(1) Avoid reporting sensitive personal information. Privacy of the individual is to be respected at all times.

(2) Generic identification such as "PO1" or "20 YR OLD FEMALE E-3" will suffice.

(3) If detailed personal identity information is required, it should be provided separately in other than general messages, such as amplifying voice reports or limited distribution messages such as "Personal For" or secure email.

(4) Names will be withheld pending notification of next of kin, unless positive identification is deemed necessary. In such cases, the names can be listed provided the following statement is included: "FOR OFFICIAL USE ONLY. NEXT OF KIN HAVE NOT BEEN NOTIFIED."

d. In some cases, an OPREP-3 NAVY UNIT SITREP will be used to amplify an OPREP-3 NAVY BLUE report.

3. Voice Message Reports

a. No voice report is required by CNO. Voice reports within five-minutes are required for OPREP-3 NAVY UNIT SITREP TALON reports if that TALON is reporting something other than a non-threat or hoax. If reporting an incident or event that has been subsequently evaluated as a non-threat or hoax, no voice report is required. The ISIC may require a voice or real-time secure electronic chat report. OPREP-3 NAVY UNIT SITREP reports for personnel incidents require a voice message report. See Annex A for a message example.

b. The voice formats contain only the most important information and may not resemble the entire record version. For brevity, send only needed information. Each line in the main body of the message contains a line number that enables the message to be transmitted faster. Templates for all voice message reports are contained in reference (b).

SECTION II - OPREP-3 NAVY UNIT SITREP TALON

1. Specific Reporting Instructions

a. The OPREP-3 NAVY UNIT SITREP TALON is used by any unit to provide the ISIC, other naval commanders, and other non-U.S. Navy AT-related commands and government agencies with notification of a possible terrorist-related incident or event or of an incident or event that has been subsequently evaluated as a non-threat or hoax.

b. Submit an OPREP-3 NAVY UNIT SITREP TALON to provide information on possible terrorist-related incidents or events or of an incident or event that has been subsequently evaluated as a non-threat or hoax. The event or incident may fall within one of the following categories:

(1) Any suspected swimmer sighting inside or near U.S. vessels that may pose a threat to vessels or facilities.

(2) Non-specific threats to Navy or other DoD interests. Non-specific threats may be received by any means, and may contain a specific time, location or area for an attack against Navy or other U.S. forces, facilities, or missions. This includes, but is not limited to, any event or incident, or series of events or incidents, which in and of themselves may indicate the potential for a threat to Navy or U.S. forces, facilities, or mission, regardless of whether the threat posed is deliberately targeted or collateral. (If the Commander determines this "non-specific threat" may warrant immediate action, consider reporting via OPREP-3 NAVY BLUE TALON.)

(3) Suspected surveillance of U.S. Navy or other DoD facilities and personnel. This includes any reported possible surveillance in which an attempt to record information or to use unusual means to monitor activities is observed. Such attempts may include use of cameras (either still or video), note taking, annotated maps or drawings, hand-drawn maps or diagrams, use of binoculars or other vision enhancing devices, or any reports from host nations security forces of possible surveillance of U.S. Navy or U.S. assets.

(4) Elicitation attempts, suspicious questioning, or other suspected intelligence collection activities focused on U.S. Navy or other DoD interests. These include any attempts to obtain security-related or military-specific information by
anyone who does not have the appropriate security clearance and the need-to-know. Elicitation attempts may be made by mail, fax, telephone, by computer, or in person.

(5) Tests of security. These include any attempts to measure security reaction times or strengths; any attempts to test or penetrate physical security barriers or procedures; and any attempts to acquire or duplicate uniforms, badges, passes, or other security related documents.

(6) Unusual repetitive activity. These include any activities that meet one of the other TALON criteria and have occurred two or more times—the same activity by the same person and/or vehicle, within a one-month period.

(7) Any other suspicious activity or incident reasonably believed to be related to terrorist activity directed against U.S. Navy or other DoD personnel, property, and activities. A suspicious activity or incident is one that meets any of the above criteria.

(a) Any activity or incident that does not specifically fit into the aforementioned criteria, yet is believed to represent a FP threat, should be reported as a suspicious activity or incident.

(b) Examples of this include: thefts of material that could be used to manufacture false identification cards; thefts of military uniforms that may be used to gain access to a military installation.

2. Report Content

 a. The OPREP-3 NAVY UNIT SITREP TALON is a USMTF based report that is being incorporated into reference (b). It is based on the OPREP-3 message. The message example is edited accordingly.

 b. The following specific information is required in the GENTEXT/INCIDENT IDENTIFICATION AND DETAIL section of the record message.

(1) Date: Date the incident occurred.

(2) Location: Where the incident occurred.
(3) TALON Criteria: (e.g., non-specific threat, surveillance, elicitation, test of security, repetitive activity, bomb threat, suspicious activity/incident.)

(4) Short Identifying Title: What the TALON is about.

(5) Source and Assessment of Credibility: Who provided the information, how credible is the source, and why do you assess the source that way.

(6) Details: Describe who, what, when, where, why, and how. Obtain all possible details of suspect(s) or suspected incident for initial and follow-up reports (including craft or vehicle information, license plates, etc.). Provide specific information on what any sources said and about what any sources did not know. Provide reasons why the incident or event is evaluated as a non-threat or hoax.

(7) Countries: What countries does the information in the TALON relate to.

(8) Persons Briefed Locally: Who was briefed locally, and when were they notified of the incident.

(9) Actions Taken.

(10) Comments: Provide any additional information.

(11) Persons Involved: (e.g., subjects, witnesses, incidentals.)

(12) POC: Name/Phone Number/Email.

c. The following specific information is required in the RMKS/COMMANDER’S COMMENTS section of the record message:

Commander’s Comments. Include the Commanding Officer’s (CO) estimate of the situation, the impact of the incident on the reporting unit, and the ability of the unit to operate. Note the status of the Naval Criminal Investigative Service (NCIS) notification/participation. Indicate if any media interest in the incident or press release is expected to be generated from the incident.
3. Voice Message Reports. Voice reports within five minutes are required for OPREP-3 NAVY UNIT SITREP TALON reports if that TALON is reporting something other than a non-threat or hoax. If reporting an incident or event that has been subsequently evaluated as a non-threat or hoax, no voice report is required. The ISIC may require a voice report.

4. Record Message Reports

   a. Initial record message reports shall be made within the timeframe specified.

   b. Message Text Format data sets are the same as for the OPREP-3 NAVY UNIT SITREP. The FLAGWORD set, FLAGWORD/NAVY UNIT SITREP/TALON///, must be manually added to the message after the REF set.

APPENDIX A - PERSONNEL INCIDENT REPORTS

1. Specific Reporting Instructions. The OPREP-3 NAVY BLUE and OPREP-3 NAVY UNIT SITREP will be used to report any personnel incident that could attract high level Navy interest. The decision to submit an OPREP-3 NAVY UNIT SITREP vice an OPREP-3 NAVY BLUE report is driven by potential media interest. Reportable personnel incidents normally fall within one of the following categories:

   a. Significant misconduct to include murder, rape, forcible sodomy, aggravated sexual assault, armed robbery, aggravated assault, assault with a deadly weapon, kidnapping, carjacking, and burglary of an occupied dwelling.

   b. Lesser misconduct to include domestic violence, domestic abuse, child abuse/neglect, child sexual abuse, indecent assault, assault with intent to commit rape or forcible sodomy, sexual harassment, suicide, suicide attempts, suicidal gestures, equal opportunity incidents, unlawful discrimination, and hazing.

   c. Sexual assault incidents require specific data to be reported in a structured format. A full description of the required information and instructions for filling out the report are contained in NAVPERS 1752/1 (Sexual Assault Incident Data Collection) form, which is located in reference (m).

2. Report Content

   a. The OPREP-3 NAVY BLUE and OPREP-3 NAVY UNIT SITREP are USMTF based reports that are being incorporated into reference (b). They are based on the OPREP-3 message. The message examples are edited accordingly.

   b. For all personnel incidents, except sexual assault, report the following specific information in the GENTEXT/INCIDENT IDENTIFICATION AND DETAILS section of the report:

      (1) Incident: (incidents listed in paragraph 1 above)

      (2) Date of incident

      (3) Time of incident: (local vice zulu time)
(4) Location of incident: (e.g. East Ocean View, Norfolk, VA; Fast Food Restaurant, South St., Norfolk, VA; etc.).

(5) Suspect or alleged offender information: (military (identify by pay grade: E-4, PO1, O-1), civil service (identify by pay grade: GS-5), civilian (CIV), foreign national, unknown (UNK); if applicable, include relationship, Spouse, Child, etc.).

(6) Gender

(7) Age

(8) Race: (American Indian or Alaskan Native; Asian; Black or African American; Native Hawaiian or Other Pacific Islander; Hispanic; White; if more than one of the previous race categories selected, identify racial groups; or; or decline to respond)

(9) Weapon: (gun, knife, bottle, etc.)

(10) Alcohol/Drug: (type/amount if known)

(11) Victim or complainant information: (military (identify by pay grade: E-4, PO1, O-1), civil service (identify by pay grade: GS-5), civilian (CIV), foreign national, unknown (UNK); if applicable, include relationship, Spouse, Child, etc.).

(12) Gender

(13) Age

(14) Race: (American Indian or Alaskan Native; Asian; Black or African American; Native Hawaiian or other Pacific Islander; Hispanic; White; if more than one of the previous race categories selected, identify racial groups; or; or decline to respond).

(15) NCIS notified, if appropriate (yes or no)

(16) Installation Family Advocacy Representative (FAR) Notified (yes, no, not applicable).
(17) Summary/brief description of incident

(18) Media Interest: (ANTICIPATED or NOT ANTICIPATED)

(19) NCIS Involvement: (ANTICIPATED, NOT ANTICIPATED, NOTIFIED)

(20) POC: Name/Phone Number/Email

c. For sexual assault incidents, the current NAVPERS 1752/1 form will contain the information required in the report.

   (1) Items marked as mandatory in the NAVPERS 1752/1 form are required in the initial report. All other items may be reported in follow-up reports.

   (2) Report the required information in the GENTEXT/INCIDENT IDENTIFICATION AND DETAILS section of the report.

   (3) When writing the report, include only the number of the data element and data element choice or response from the NAVPERS 1752/1 form. Do not restate the question.

3. Voice Reports for OPREP-3 NAVY BLUE and OPREP-3 NAVY UNIT SITREPS

   a. OPREP-3 NAVY BLUE Incidents require:
      
      (1) Voice report to appropriate FCC within the timeframe specified.

      (2) Voice report to the appropriate OPNAV N1 POC within 24 hours.

   b. OPREP-3 NAVY UNIT SITREP Incidents require:

      (1) Voice report to the command's ISIC, if required.

      (2) Voice report to the appropriate OPNAV N1 POC within 24 hours.

   c. OPNAV N1 POCs:

d. Voice message formats are the same as for the OPREP-3 NAVY BLUE or the OPREP-3 NAVY UNIT SITREP.

5. Definitions and Guidance

a. Domestic Violence: An offense under the United States
Code, the Uniform Code of Military Justice (UCMJ) or state law,
that involves the use, attempted use, or threatened use of force
or violence, or a violation of a lawful order issued for the
protection of a person who is a current or former spouse, a
person with whom the abuser shares a child in common, or a
current or former intimate partner with whom the abuser shares
or has shared a common domicile.

b. Domestic Abuse: An offense as defined above, or a
pattern of behavior resulting in emotional or psychological
abuse, economic control, and/or interference with personal
liberty that is directed toward a person who is a current or
former spouse, a person with whom the abuser shares a child in
common, or a current or former intimate partner with whom the
abuser shares or has shared a common domicile.

c. Child Abuse/Neglect: The physical injury, sexual abuse,
emotional abuse, deprivation of necessities, or other abuse of a
child by a parent, guardian, employee of a residential facility,
or any person providing out-of-home care, who is responsible for
the child's welfare, under circumstances that indicate the
child's welfare is harmed or threatened, as defined in reference
(h). The term encompasses both acts and omissions on the part
of such a responsible person. This term includes offenders
whose relationship is outside the family and includes, but is
not limited to, individuals known to the child and living or
visiting in the same residence who are unrelated to the victim
by blood or marriage, and individuals unknown to the victim.
Specific types of child abuse/neglect are:

(1) Child Physical Abuse: A type of abuse to include,
but not limited to, acts resulting in: death, brain damage or
skull fracture; subdural hemorrhage or hematoma; bone fracture;

A-11

FOR OFFICIAL USE ONLY
dislocation or sprain; internal injury; poisoning; burn or scald; severe cut or laceration; other physical injury that seriously impairs the health or physical well being of the child victim; or other minor injury which includes minor bruises, welts, cuts, and twisting or shaking which do not constitute a substantial risk to the life or well-being of the victim.

(2) Child Emotional Abuse: Actions including, but not limited to, active, intentional berating, disparaging, or other behavior towards the victim that adversely affects the psychological well-being of the victim.

(3) Child Neglect: Actions or omissions by a parent, guardian, or caretaker, which include, but are not limited to, deliberate or negligent withholding or deprivation of necessities (nourishment, shelter, clothing, and health care), lack of adequate supervision, emotional or educational neglect, and abandonment.

(4) Extra-Familial Child Abuse: Includes child abuse by strangers, persons in loco parentis, and child-to-child abuse.

d. Child Sexual Abuse: Actions including, but not limited to, the employment, use, inducement, enticement, or coercion of any child to engage in, or having a child assist any other person to engage in, any sexually explicit conduct (or any simulation of such conduct). This includes, but is not limited to, rape, molestation, prostitution, or other sexual activity between the offender or a third party and a child, when the offender is in a position of power over the child. Sexual abuse also includes exploitation to include forcing or allowing a child to look at the offender's genitals, forcing or allowing a child to observe an offender's or another's masturbatory activities, exposing of a child's genitals for sexual gratification of the offender(s), talking to a child in a sexually explicit manner, surreptitious viewing of a child while undressed for the offender's sexual gratification, or involving a child in sexual activity such as pornography or prostitution in which the offender does not have direct physical contact with the child. Child sexual abuse also includes incest that is defined as sexually explicit activity between a parent/stepparent and a child, a sibling, or another relative too closely related to be permitted by applicable law to marry.
e. Sexual Assault: An assault with the intent to gratify the lust or sexual desires of the accused through the use of unlawful force or violence either as an overt act with the intent of inflicting bodily harm, or as an unlawful demonstration of violence through an intentional or culpable negligent act or omission, either of which creates in the mind of another a reasonable apprehension of receiving immediate bodily harm, as defined in reference (i). For the purposes of this message, the term sexual assault is used to include all of the terms below and applies to adult victims and perpetrators.

(1) Assault with intent to commit rape: the accused must have intended to complete the offense of rape and to overcome any resistance by force.

(2) Assault with intent to commit sodomy: an assault against a human being committed with the specific intent of completing the offense of sodomy.

(3) Indecent assault: an assault with the intent to gratify the lust or sexual desires of the accused.

(4) Rape: an act of penile-vaginal intercourse by force and without consent. Penetration, however slight, is sufficient to complete the offense.

(5) Forcible sodomy: an act done by force and without consent whereby one person takes into his/her mouth or anus the sexual organ of another person (of the same or opposite sex) or of an animal; places his/her sexual organ in the mouth or anus of another person or of an animal; places his/her sexual organ in any opening of the body other than the sexual parts of another person; or has penile-vaginal intercourse with an animal. Penetration, however slight, is sufficient to complete the offense.

f. Sexual Harassment: A form of sex discrimination that involves unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature. Sexual harassment includes the below and is prohibited as noted in reference (j).

(1) Submission to such conduct is made either explicitly or implicitly a term or condition of a person's job, pay, or career, or
(2) Submission to or rejection of such conduct by a person is used as a basis for career or employment decisions affecting the person, or

(3) Such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or creates an intimidating, hostile, or offensive working environment.

An allegation of sexual harassment that is submitted in writing via a Navy equal opportunity/sexual harassment formal complaint form (NAVPERS 5354.2), a UCMJ Article 138 (complaint against Commanding Officer), a U.S. Navy Regulations Article 1150 (redress of wrong committed by a superior), communication to Navy Inspector General or elected officials, NAVPERS 1626/7 (Report of Disposition of Offenses), or any other communication the Commander deems appropriate must be reported, investigated, and resolved. Personal advocates shall be available to assist complainant, respondent, and witnesses within 24 hours after submission of a formal complaint.

g. Suicide: An intentional act resulting in one's own death, as defined in reference (o). Because suicide is a leading cause of death among sailors, suicide attempts and gestures must be investigated.

(1) Suicide Attempt: An intentional act, causing physical self-harm, where death could have reasonably occurred without direct intervention.

(2) Suicide Gesture: An intentional threat or comment suggesting a cry for help regarding someone's intent to commit suicide. Suicidal gestures would not cause death if left unattended. It is strongly recommended that a medical officer make the determination regarding the difference between an attempt and a gesture, since this is a determination about a medical condition of a sailor or marine. In the absence of a physician, the Commanding Officer, in consultation with the Independent Duty Corpsman, will make the determination on the validity of a suicidal gesture, and report it as required.

h. Equal Opportunity: The right of all persons to participate in, and benefit from programs and activities for which they are qualified, as defined in reference (j). These programs and activities shall be free from social, personal, or
institutional barriers that prevent people from rising to the highest level of responsibility possible. Persons shall be evaluated on individual merit, fitness, and capability; regardless of race, ethnicity, national origin, sex, or religion.

i. Unlawful Discrimination: includes discrimination on the basis of race, ethnicity, national origin, sex, or religion that is not otherwise authorized by law or regulation.

j. Hazing. Any conduct whereby a military member or members, regardless of service or rank, without proper authority, causes another military member or members, regardless of service or rank, to suffer or be exposed to any activity which is cruel, abusive, humiliating, oppressive, demeaning, or harmful, as identified in reference (p). Soliciting or coercing another to perpetrate any such activity is also considered hazing. Hazing need not involve physical contact among or between military members; it can be verbal or psychological in nature. Actual or implied consent to acts of hazing does not eliminate the culpability of the perpetrator.

(1) Hazing can include, but is not limited to, the following: playing abusive or ridiculous tricks; threatening or offering violence or bodily harm to another; striking; branding; taping; tattooing; shaving; greasing; painting; requiring excessive physical exercise beyond what is required to meet standards; "pinning;" "tacking on;" "blood wings;" or forcing or requiring the consumption of food, alcohol, drugs, or any other substance.

(2) Hazing does not include command-authorized or operational activities; the requisite training to prepare for such missions or operations; administrative corrective measures; extra military instruction; athletics events; command-authorized physical training; contests or competitions and other similar activities that are authorized by the chain of command.
APPENDIX B - ARMS, AMMUNITION, AND EXPLOSIVE (AA&E) MISSING, LOST, OR STOLEN INCIDENT REPORTS

1. Specific Reporting Instructions

a. An OPREP-3 NAVY BLUE report is used to provide the CNO and other naval commanders with immediate notification of:

   (1) Incidents of Missing, Lost, or Stolen (MLS) Arms, Ammunition, or Explosives (AA&E).

   (2) Weapon discharge incidents resulting in injury to personnel or media interest.

b. An OPREP-3 NAVY UNIT SITREP is used to provide the ISIC with notification of:

   (1) Weapon discharge incidents that do not result in injury to personnel or media interest.

   (2) Any negligent discharge of a weapon that does not cause injury to personnel.

c. Loss of the following AA&E must be reported to CNO(N3AT) using OPREP-3 NAVY BLUE voice and record message reporting requirements.

   Note: This refers to Security Risk Category I through IV items only, per reference (aa).

   (1) One or more Category I missile or rocket rounds.

   (2) One or more machine guns or other automatic fire weapons.

   (3) Twenty-five or more manually operated or semiautomatic weapons (revolvers, semiautomatic pistols, etc.).

   (4) Over 5,000 rounds (or 20,000 rounds of .38 caliber) of ammunition smaller than 40mm; five rounds or more of ammunition 40mm and larger.

   (5) Any fragmentation, concussion, or high explosive grenades, or artillery or ground burst simulators, or other type of simulators or devices containing explosive materials.
(6) One or more mines (antipersonnel or antitank).

(7) Demolition explosives including detonation cord, blocks of explosives (C-4), and other explosives.

d. Incidents that result in significant news coverage, or appear to have the potential to cause such coverage, must be reported.

e. Reporting requirements begin when a loss is discovered, whether by discovery of an incident, receipt of a loss claim, completion of an inventory, or any other means.

2. Report Content. The OPREP-3 NAVY BLUE is a USMTF based report that is being incorporated into reference (b). It is based on the OPREP-3 message. The message examples are edited accordingly.

a. The following specific information shall be included in the GENTEXT/INCIDENT IDENTIFICATION AND DETAILS section of the OPREP-3 NAVY BLUE report, except as annotated:

(1) Time and location of the incident (TIMELOC set).

(2) Description of the event: (e.g., missing, lost or stolen items).

(3) AA&E item identification and material description.

(4) Incident cause and details.

(5) Investigation information, include the status of Naval Criminal Investigative Service (NCIS) notification or participation, if any.

(6) POC: Name/Phone Number/Email.

3. Voice Message Reports

a. Initial voice message reports shall be made within the timeframe specified.

b. OPREP-3 NAVY BLUE voice message formats for AA&E incidents are the same as for OPREP-3 NAVY BLUE reports. OPREP-3 NAVY UNIT SITREP voice reports are not required by CNO.
c. OPREP-3 NAVY BLUE Voice Message Report Example

5. POC: LT BROWN, COMM 555-555-5555, DSN 555-5555, LT.BROWN@NAVY.MIL
1. Specific Reporting Instructions. The OPREP-3 NAVY BLUE will be used to report any marine mammal incident.

   a. This guidance applies to all Navy commands, including any ship or aircraft under contract to, or conducting research and development or test and evaluation activities for the Navy. CNO(N45) is the clearinghouse for all Navy information related to marine mammal strike or stranding occurrences worldwide. CNO (N3/N5) will support CNO(N45) directly in coordinating these marine mammal incident reports.

   b. In the event of a marine mammal strike or stranding, CNO (N45) is the sole point of contact for liaison activities with the National Oceanographic and Atmospheric Administration National Marine Fisheries Service (NOAA Fisheries) Headquarters. Coordination with CNO (N45) is required prior to engaging regional NOAA Fisheries offices with regard to a stranding or strike incident.

   c. The CNO Battle Watch Captain in the NOC, Washington DC is responsible for collecting/disseminating operational and ashore information to CNO leadership. The NOC must receive all voice and message reports related to marine mammal incidents so that it can notify appropriate OPNAV action officers and leadership. Marine mammal incidents by their very nature require coordination of information across commands, both afloat and ashore. Fleet Commanders have the lead for information coordination and will support the NOC. Regional Commanders shall support the Fleet Commanders by coordinating shore command marine mammal incident information.

2. Report Content. The OPREP-3 NAVY BLUE is a USMTF based report that is being incorporated into reference (b). It is based on the OPREP-3 message, and the message examples are edited accordingly.

   a. Initial Report. The initial voice will conform to the requirements of Chapter 2, Sections I and II, of this instruction. The initial voice and record message report is intended to inform the chain of command expeditiously of the existence of a marine mammal event within the timeframe specified.
b. Follow-up Reporting. Not all reportable marine mammal events require follow-up reporting. Based on the initial report and the attendant facts and circumstances surrounding the event, CNO(N45) will coordinate with the NOC to determine whether follow-up reporting is required. Factors such as proximity of naval forces, physical condition of the animal, Congressional interest, other agency interest, media interest, and other pertinent information will be considered in making the determination.

(1) If required, follow-up reports will be made via naval message to CNO (N3/N45/N5) and the NOC within 48 hours following the initial report. Negative reports are required.

(2) Contents of Follow-up Reports. Follow-up reports shall only contain information not included in the initial report. The report shall be submitted within 48 hours following the initial report even if not all information is available. Additional follow-up reports must be submitted every 48 hours thereafter until all information has been forwarded to CNO (N3/N5/N45).

(3) Under certain circumstances, more comprehensive reporting may be appropriate. In such instances, especially if litigation is anticipated, an investigation may be directed pursuant to Section 0209 of reference (af). Close coordination between the cognizant Fleet Commander and CNO (N45) will be essential in these situations.

c. Include the time and location of the incident in the TIMELOC section of the report.

d. The following specific information shall be included in the GENTEXT/INCIDENT IDENTIFICATION AND DETAILS section of the report:

(1) Type of Marine Mammal Incident (Strike or Stranding).

(2) Date of incident.

(3) Time of incident: (local vice zulu time).

(4) Location of incident: (include lat/long).

(5) Whale Strike Details:
a. Identity of person who discovered event (e.g., military, civilian, other government personnel).

b. Circumstances surrounding the discovery (e.g., NOAA survey flight, normal steaming operations, press coverage, local agency notification).

c. Description of animal, if available.

d. Existence of photographs or video.

(6) Stranding Details:

a. Time strandings commenced.

b. Time of last stranding.

c. Where strandings occurred (geographical name of location and lat/long).

d. How many marine mammals stranded and apparent condition (alive, dead, severely decayed, etc).

e. Species type(s).

f. How many marine mammals died.

g. Whether necropsies performed.

h. Who performed the necropsy.

(7) Identity of any naval units (surface, subsurface, or air) in the region potentially involved.

(8) Acoustic activity: if active sonar or explosive devices employed by any units listed under paragraph 2.d. (7) above, provide the following:

a. Sonar employed.

b. Ship's tracks and heading.

c. Time of employment (24 hours leading up to and following initial strandings).

d. Power levels used.
(9) Oceanographic details: (These factors are key to any assessment of whether sonar may have contributed to this stranding event.)

   a. Meteorological information (surface winds, sea states).

   b. Sound velocity profiles, bathythermograph observations, thermal profiles.

   c. Bathymetry, bottom composition.

   d. Surface ducts.

(10) Any mitigation measures in effect (steps taken by naval units identified in paragraph 2.d. (7) above, to mitigate against impacts on marine mammals), including:

   a. Lookouts (training, if any, in marine mammal sighting).

   b. Marine mammal pre-exercise surveys.

   c. Coordination with air assets.

   d. Marine mammals spotted prior to and during exercise.

   e. Steps taken to avoid marine mammals.

(11) The existence, if any, of environmental planning documents (e.g., National Environmental Policy Act (NEPA) documents, Protective Measures Assessment Protocol (PMAP) reports) relevant to the naval activity described above.

(12) Location of relevant documents, logs, and records: (In addition to the information delineated above, retain all associated documents, logs, and records relating to ship movement, sonar usage, weather/environmental observations, bathythermograph observations for units identified in paragraph 2.d. (7) above.)
(13) Additional information (e.g., possible difficulties in obtaining information from a foreign navy or government, media attention anticipated).

(14) Command POC: Name/Phone Number/Email.

3. Voice Message Reports
   a. Initial voice reports shall be made within the timeframe specified.

   b. Once received from the Fleet Command Center, the NOC will notify CNO(N45) Marine Mammal POC.

   c. Voice message formats for Marine Mammal incidents are the same as for the OPREP-3 NAVY BLUE.

   d. Voice Message Report Example

      HOMEPLATE THIS IS RANGER OPREP THREE NAVY BLUE OVER
      RANGER THIS IS HOMEPLATE SEND OPREP THREE NAVY BLUE OVER
      HOMEPLATE THIS IS RANGER
      ROUTINE
      UNCLASSIFIED
      OPREP THREE NAVY BLUE
      LINE ONE INCIDENT WHALE STRIKE OFF SOUTH COAST OF JAPAN
      LINE TWO NARRATIVE SHIP CONDUCTING ROUTINE OPERATIONS WHEN SPERM
      WHALE HIT SHIP’S SCREW BREAK WHALE SWAM AWAY TRAILING BLOOD
      BREAK UNABLE TO FOLLOW
      OVER

4. Record Message Report
   a. Initial record message reports shall be made within the timeframe specified. Updated reports are required in accordance with paragraph 2.b above.

   b. Message Text Format data sets are the same as for the OPREP-3 NAVY BLUE.

   c. OPREP-3 NAVY BLUE Record Message Example

      (1) ACTION Addressees:

      CNO WASHINGTON DC//N3/5/N4/N45/N3NOC//
      Unified Commander:
      CDR USJFCOM NORFOLK VA

Other Operational and Administrative Commanders

(2) INFO Addressees:

Chain of Command
CHINFO WASHINGTON DC//00//
COMSC WASHINGTON DC (Military Sealift Command incidents)
SOPA

d. OPREP-3 NAVY BLUE Record Message Example

1. MARINE MAMMAL INCIDENT: WHALE STRIKE
2. DATE OF INCIDENT: 09AUG2005
3. TIME OF INCIDENT: 0753L
4. LOCATION OF INCIDENT: OFF JAPAN'S SOUTHERN COAST
5. WHALE STRIKE DETAILS:
   A. PERSON DISCOVERING EVENT: SN SMITH, LOOKOUT
   B. CIRCUMSTANCES SURROUNDING DISCOVERY: NORMAL STEAMING OPS
   C. DESCRIPTION OF ANIMAL: SPERM WHALE
   D. PHOTOS/VIDEOS: NONE
6. STRANDING DETAILS: N/A
7. NAVAL UNITS INVOLVED: NONE
8. ACOUSTIC ACTIVITY: NONE
9. OCEANOGRAPHIC DETAILS: SEA STATE 1
10. MITIGATION MEASURES IN EFFECT: ALL LOOKOUTS QUALIFIED IN MARINE MAMMAL SIGHTING
11. ENV PLANNING DOCS: NONE
12. LOCATION OF RELEVANT DOCS: LOGS RETAINED ONBOARD
13. ADDITIONAL INFO: MEDIA ATTENTION ANTICIPATED
14. POC: LT BROWN, COMM 555-555-5555, DSN 555-5555, LT.BROWN@NAVY.MIL//
5. Guidance and Definitions

a. Reportable Marine Mammal Events. Due to the nature, location, and visibility of certain events involving marine mammals, expeditious reporting is required.

b. Whale strikes. Whale strikes continue to be reportable events per reference (ab).

c. Strandings. The NOAA Fisheries definition of stranding includes not only those animals found alive or dead on beaches, but also those floating dead in open water. A stranding may come to the Navy's attention from a variety of sources and throughout the chain of command. Often, a media report or a direct contact from a local organization provides the first indication of a stranding, particularly in areas in which the Navy operates infrequently. In any event, prompt notification and reporting of certain strandings is necessary to ensure timely response to inquiries and to correct misinformation. The following strandings are reportable events:

(1) Any stranding that involves a Northern Right Whale or Beaked Whale.

(2) Any stranding that involves a floating whale in open water.

(3) Any discovery of a whale stranded ashore.

(4) Any mass stranding (two or more animals) of whales or dolphins that results in coverage by the local or national media.

d. Other. Claims of unusual marine mammal behavior reported in the media, or by National Marine Fisheries Service, a private party or non-governmental entity in which naval operations, exercises or training have been implicated are reportable events. Any other incident involving marine mammals, which have significant media interest and may implicate naval operations at sea are also reportable events. Examples of such marine mammal events might include manatee strandings or mass strandings (two or more) of dolphins, seals, sea lions, otters, etc.

e. For purposes of this section, "naval operations at sea" means surface and subsurface activities involving one or more...
units engaged in operations, exercises or training. It also includes air operations that may have an affect on the marine environment.

f. Navy Marine Mammal Stranding Response Team (NMMSRT). The NMMSRT is responsible for marine mammal incident management including notification of their chain of command, incident analysis, and incident response. For all events resulting in follow-up reporting, CNO (N45) will coordinate efforts of the NMMSRT. The NMMSRT will include CNO (N3/N45/N5), Chief of Navy Information (CHINFO), Office of Legislative Affairs-Navy (OLA-N), and the cognizant Fleet Commander.

g. NOC Battle Watch Captain shall liaison with the appropriate Fleet Battle Watch Centers to obtain information on Navy units that may have been in the vicinity (50 nautical miles and 24 hours). However, depending on the condition of the animal, the NMMSRT may direct that the search scope be expanded up to several days of the reported event. Submarine or aircraft information may not be immediately available and shall be provided as an update to the NMMSRT as soon as the information is available. In addition, sonar use information for units so equipped identified as being in the vicinity of the event shall be obtained and forwarded to the NOC Battle Watch Captain as rapidly as possible. No interim commands will issue any press releases, comment on stranding/strike incidents unless directed by the NMMSRT.

<tr>
<td>Alternative Content Field</td>
<td>A field offering a choice between two or more specified field formats.</td>
</tr>
<tr>
<td>Alternative Field Prefix</td>
<td>A combination of a letter and a colon which may precede a field content to identify the alternative chosen from two or more specified field formats.</td>
</tr>
<tr>
<td>Amplification Set</td>
<td>A Free-Text set (set identifier AMPN) that is used to insert an explanation of additional information concerning only the preceding set.</td>
</tr>
<tr>
<td>Blank Character</td>
<td>See &quot;Space Character.&quot;</td>
</tr>
<tr>
<td>Character</td>
<td>A letter, digit, or other symbol that is used to represent data.</td>
</tr>
<tr>
<td>Columnar Set</td>
<td>A formatted set having an ordered collection of data aligned vertically under a horizontal array of Column Headers.</td>
</tr>
<tr>
<td>Column Header</td>
<td>A keyword that describes the type of information contained within a column of a Columnar Set.</td>
</tr>
<tr>
<td>Composite Field</td>
<td>A field, comprised of two or more subfields, the content of which represents a chain or linked data items.</td>
</tr>
</tbody>
</table>
### APPENDIX E - GLOSSARY OF TERMS

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Composite Field Format</td>
<td>A field format comprised of two or more subfield formats that specify the sequences of character types required to complete a composite field.</td>
</tr>
<tr>
<td>Data Base</td>
<td>A collection of data, or a part of the whole of another collection of data, consisting of at least one file, that is sufficient for a given purpose or for a given data processing system.</td>
</tr>
<tr>
<td>Data Chain</td>
<td>The combination of two or more data elements linked together in a specified order for a particular purpose or use.</td>
</tr>
<tr>
<td>Data Code</td>
<td>A number, letter, or symbol, or any combination thereof, used to represent a data item of a data element.</td>
</tr>
<tr>
<td>Data Element</td>
<td>A class (or unit) of information that has a unique meaning. The members (or subunits) of the class are data items.</td>
</tr>
<tr>
<td>Data Entry (DE) Column</td>
<td>A two-digit data field within a selected Columnar set used to relate data lines (1) with data lines within another Columnar set, and/or (2) with amplifying information contained in Free-Text sets in the same message.</td>
</tr>
</tbody>
</table>
## Term | Definition
--- | ---
**Data Item** | A subunit of information within a class of data (data element). Each data item has some unique feature that distinguishes it from other data items classified under the same data element. However, each data item also has characteristics, conditions, or properties that determine the class, i.e., the data element of which it is a member.

**Delimiter** | A character (normally a space or special character) used to provide separation and distinction between two linked data codes.

**End-of-Set Marker** | Two consecutive slant symbols (//) that terminate a set.

**Extended Special Character** | Explanation point (!), at symbol (@), number symbol (#), dollar sign ($), percent sign (%), caret (^), ampersand (&), asterisk (*), equal sign (=), underscore (_), plus sign (+), left bracket ([), right bracket (]), left brace ({), right brace (}), backward slant (\), quote ("), apostrophe ('), semi-colon (;), less than symbol (<), greater than symbol (>), tilde (~), vertical bar (|), and backward accent (/). Lower case letters (a-z) are also allowable. (Also see Special Character.)

**Field** | An area within a set designated for the entry of characters.

**Field Content** | A combination of characters which represents either a specific data item or a chain of linked data items.
**APPENDIX E - GLOSSARY OF TERMS**

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Field Descriptor</td>
<td>A keyword (which may be a word, an abbreviation, or an acronym) composed of one to eight alphanumerics that, when used, describes the type of information in a field of a set.</td>
</tr>
<tr>
<td>Field Marker</td>
<td>A slant symbol (/) that is used to indicate the start of a field.</td>
</tr>
<tr>
<td>Fixed-Length Field Format</td>
<td>A field format that requires an invariable (fixed) number of characters.</td>
</tr>
<tr>
<td>Formatted Message</td>
<td>A message in which the text is organized in a predetermined sequence of standard formatted subdivisions, suitable for human and automatic interpretation and processing.</td>
</tr>
<tr>
<td>Free-Text Set</td>
<td>A set having the set identifier AMPN, GENTEXT, NARR, or RMKS and containing a Free-Text field format of unlimited length.</td>
</tr>
<tr>
<td>General Text</td>
<td>A Free-Text set (set identifier GENTEXT) consisting of one formatted field and one Free-Text field, used to introduce specific information that is not directly related to one or more formatted sets of a message.</td>
</tr>
<tr>
<td>Group of Fields</td>
<td>A collection of fields at the end of a set format designated to enable its repetition as a group.</td>
</tr>
<tr>
<td>Header Line</td>
<td>The second line of a Columnar set. It contains appropriately spaced Column Headers separated by field markers.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-------------------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Keywords</td>
<td>Message Identifiers, Set Identifiers, Field Descriptors, or Column Headers that identify specific messages, sets, or the type of information contained in fields or subfields. They assist both the human and computer in understanding and in processing messages.</td>
</tr>
<tr>
<td>Left-Justify</td>
<td>To position data within the space allocated so that the first data character occupies the left-most character position of the field or subfield.</td>
</tr>
<tr>
<td>Line</td>
<td>A horizontal array of not more than 69 characters.</td>
</tr>
<tr>
<td>Linear Set</td>
<td>A formatted set having an ordered collection of data fields presented in a horizontal manner.</td>
</tr>
<tr>
<td>Mandatory</td>
<td>The occurrence categorization of those field formats and set formats which are related to essential information.</td>
</tr>
<tr>
<td>Message Text</td>
<td>That part of a message that contains the information to be conveyed. It is comprised of introductory, main, and closing text sections.</td>
</tr>
<tr>
<td>Message Text Formats (MTFs)</td>
<td>Structured messages in keyword format using alphanumeric, special, and blank characters suitable for both human and machine use. MTFs may be transmitted over a variety of communication link types, including digital data links.</td>
</tr>
<tr>
<td>Narrative Set</td>
<td>A Free-Text set (set identifier NARR) used to insert an explanation or additional information concerning two or more immediately preceding sets.</td>
</tr>
</tbody>
</table>
## APPENDIX E - GLOSSARY OF TERMS

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nested Segment</td>
<td>A segment embedded in another, larger segment or nested segment.</td>
</tr>
<tr>
<td>Numeric Character</td>
<td>One of the digits from 0 to 9.</td>
</tr>
<tr>
<td>Occurrence Category</td>
<td>The class assigned to field formats and set formats that determine whether the formats are to be included in the message text. Occurrence categories are mandatory, operationally determined, or conditional.</td>
</tr>
<tr>
<td>Operationally Determined</td>
<td>The occurrence categorization of those field formats and set formats, related to information, which, although pertinent, is not essential. Inclusion of operationally determined set and/or field information is operationally determined by the message drafter.</td>
</tr>
<tr>
<td>Remarks Set</td>
<td>A Free-Text set (set identifier RMKS) used to insert an explanation or additional information concerning the entire message.</td>
</tr>
<tr>
<td>Right-Justify</td>
<td>To position data within the space allocated so that the last data character occupies the right-most character position of the field or subfield (applies only to Columnar sets).</td>
</tr>
<tr>
<td>Sectioning</td>
<td>A communications system procedure to limit transmission times by breaking a lengthy message into numbered sections.</td>
</tr>
<tr>
<td>Segment</td>
<td>A group of set formats related by their content that is designated in a message format to enable its repetition as a group.</td>
</tr>
<tr>
<td>Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-------------------------------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Set</td>
<td>A predetermined field or sequence of fields, preceded by a Set Identifier, containing all the required information concerning an aspect of the subject addressed by a formatted message.</td>
</tr>
<tr>
<td>Set Format</td>
<td>A unique set format identifier followed by specified sequence of one or more field formats.</td>
</tr>
<tr>
<td>Set Identifier (Columnar Set)</td>
<td>One numeric followed by two to seven alphabetic characters used as a key to the structure of a Columnar set.</td>
</tr>
<tr>
<td>Set Identifier (Linear and Free-Text Sets)</td>
<td>Three to eight alphabetic characters used as a key to the structure of a Linear or Free-Text set.</td>
</tr>
<tr>
<td>Space Character</td>
<td>A normally nonprinting character. Same as a blank character.</td>
</tr>
<tr>
<td>Special Character</td>
<td>A graphic character that is not a letter nor a number nor a space character. Allowable Special Characters for USMTF messages are: . , : - / ( ) ? (Also see Extended Character.)</td>
</tr>
<tr>
<td>Subfield</td>
<td>An area within a composite field designated for the entry of specified information (data code).</td>
</tr>
<tr>
<td>Subfield Content</td>
<td>A combination of characters that represent a specific data item.</td>
</tr>
<tr>
<td>Subfield Format</td>
<td>A field format that is used as part of a composite field format.</td>
</tr>
<tr>
<td>Variable-Length Field Format</td>
<td>A field format that allows use of a variable number of characters within prescribed limits.</td>
</tr>
